The heritage of the past is the seed that brings forth the harvest of the future."

Inscribed on the National Archives Building, Washington DC

ALL SEED PACKETS

\$3.60 (INCL. GST)

OUR SEED:

All of our seed is:

Non-Hybrid Hybrid seed is the result of cross-pollinating two or more different types of a variety to produce another. If seed is saved & planted from this hybrid plant, either (1) the seed will not germinate or (2) the germinated seed will not grow true-to-type. We choose to AVOID hybrid varieties.

Open-Pollinated All of our seed comes from open-pollinated varieties. This means that they will remain true-to-type, producing the same type of plant year after year, provided cross pollination does not occur. If you wish to save your own seed, be sure to follow seed saving guidelines, ensuring correct distancing requirements etc.

Non-GMO We do not buy, sell, grow or support the growth of GMO seed.

Chemical Free* We choose NOT to coat our seed with artificial chemicals, choosing rather to present it to you in the most natural form possible. Also, where possible, we choose seed which is organic or organically grown.

(* Seed has not been coated with Thirim, Methyl Bromide or any other artificial coating)

Germination Tested Whether our seed is grown by ourselves, or it is produced by one of our carefully selected experienced seed growers, all of our seed is germination tested prior to release.

While the majority of our seed shows 95-100% germination, all will have at least 85% at time of packaging.

It is important to keep in mind that regardless of our test results, it is your climate, soil & planting practice that will have the final say for actual in-ground germination.

NOTE:

Seed quantities listed are approx. & may be subject to change depending on batch.

Prices are subject to change without notice.

Catalogue current from 1 January 2018 to 31 December 2018.

Unless indicated otherwise on order form, if items are ordered but are currently out of stock, these items will either be substituted for a similar variety, or placed on backorder & forwarded to you as soon as possible, unless otherwise indicated..

It is the responsibility of the purchaser to ensure that all seed varieties ordered are permitted entry into their state according to their state's quarantine requirements, but please feel free to discuss this with us.

QUARANTINE & SHIPPING

Please note that we are able to send seed to all states of Australia except Western Australia. If a particular variety is not permitted entry into a particular state, it will have the words ***NOT TO TAS*** (or similar) at the beginning of the description.

HOW TO ORDER:

You can place an order by.....

POST/FAX: Simply fill out the Order Form enclosed, and post with payment (payment may be made by cheque, money order, credit card or direct deposit) to:

**The Lost Seed
PO Box 3092
BEMBOKA
NSW 2550**

Alternatively, fax your order to us at
fax: 02 6493 0486

ONLINE: Visit our website at
www.thelostseed.com.au and order online (payment may be made using your credit card via the secure Paypal system) or Bank Deposit.

PHONE : Call us on ph: **02 6493 0486** with your order (payment may be made using credit card)

We will then quickly process your order & despatch it to you by Australia Post. Alternatively our seeds may be purchased from a number of stores across Australia (please contact us for

VEGETABLES

ARTICHOKE

(Cynara scolymus) Perennial. Silver-green plant, 90-180cm tall. Produces edible flower buds (artichokes) in 1.5 years. Best steamed or stuffed. Harvest when young. May be used in garden as wind-break. Approx. 25-30 seeds / gram

SOW WHEN

Cool: Mid Spring to Early Summer
Warm: Mid Autumn to Late Spring
Tropical: Late Summer to Late Spring

COMPANIONS

In between artichoke bushes, plant shallow rooted crops such as lettuce.

GREEN GLOBE Heirloom first introduced in 1859. Silver-green plant, 90-180cm tall. Popular variety. Quick growing. 40 seeds

PURPLE DE JESI Heirloom. Similar to Green Globe with purplish-green heads. 50 seeds

ASPARAGUS

(Asparagus officinalis) Approx. 50 seeds / gram. Harvest in approx. 2-3 years

SOW WHEN

Cool: Early Spring to Late Spring
Warm: Late Winter to Late Spring
Tropical: Late Summer to Late Spring

SOIL TEMP

15-30°C

COMPANIONS

LIKES: Tomato, Parsley, Basil

ARGENTEUIL French heirloom. Large, purple-tipped, creamy white, very thick (up to 2cm across) spears with mild, sweet flavour. appear earlier in spring than other varieties. Ideally suited to blanching to produce white asparagus. Heat tolerant. 60 seeds

MARY WASHINGTON Heirloom. Perennial. Long, straight spears with tight tips. Popular variety. Continuous picking for 2-3 months. 150 seeds

BEAN, BUSH

(Phaseolus nanus) Sow after frost. Approx. 5-10 seeds / gram

SOW WHEN

TEMP
Cool: Mid Spring to Mid Summer
Warm: Early Spring to Late Summer
Tropical: Late Summer to Mid Spring

SOIL

15-30°C

COMPANIONS

LIKES: Beetroot, Borage, Cabbage, Carrot, Cauliflower, Marigold, Squash, Strawberry, Corn, Tomato, Potato, Cucumber, Summer Savory **DISLIKES:** Chives, Fennel, Garlic, Leek, Onion, Gladiolus

BLACK SOYBEAN Heirloom first introduced in 1897 by Peter Henderson & Co. Long, slender, slightly curved green beans 12-15cm long with shiny, black seeds produced on bush to 45cm high. Excellent eating either as fresh green bean or as dried legume. Cold weather tolerant germinating well in cold soil, but also does well in most areas. High yields. Easy to grow. 53-70 days. 50 seeds

BLACK VALENTINE Heirloom first introduced in 1897 by Peter Henderson & Co. Long, slender, slightly curved green beans 12-15cm long with shiny, black seeds produced on bush to 45cm high. Excellent eating either as fresh green bean or as dried legume. Cold weather tolerant germinating well in cold soil, but also does well in most areas. High yields. Easy to grow. 53-70 days. 80 seeds

CHEROKEE WAX Also known as 'Valentine Wax'. Butter Bean. Vigorous, heavy producer, bright yellow, straight, flat pods to 18cm, black seed when mature. Stringless at all stages. Plant 40-45cm high. 120 seeds

FLAGRANO Popularly known as 'The Caviar of Beans'. French heirloom originating in the 1800's and considered a delicacy in Europe. Small, light green beans packed with flavour. 8-10 seeds each pod. Note: Pods are inedible with only the beans inside suitable for use. Harvest inner beans fresh for use like pea or broad bean, or leave to mature and use as a dried legume in soups, stews, patties etc. Dried beans cook to a dense and creamy texture which resist falling apart when cooked. 56-80 days. 120 seeds

IDELIGHT Also known as 'Gourmet Delight'. Green, round, stringless bean to 15cm in length. Produces over a long period. Disease resistant. 180 seeds

PROVIDER Originally introduced in 1965 by Dr. Hoffman of South Carolina. Compact bush producing abundant, stringless green beans 12-15cm length. Disease resistant. Excellent flavour. Early variety. 120 seeds

RED KIDNEY Dwarf variety. Large kidney shaped, deep red bean so named for its visual resemblance in shape and colour to a kidney. Use in soups, casseroles and Mexican dishes. High yields. 90-100 days. 80 seeds

ROYAL BURGUNDY Purple, round, stringless pods with white seeds, 12-15 cm in length with firm texture & excellent flavour. Resistant to common bean mosaic. 53 days. 120 seeds

VERMONT CRANBERRY Heirloom from New England dating back prior to the 1800's. Long, green, speckled pods to 15cm. When left to mature, contains oval, medium sized, plump, red beans with pink streaks. Used as a fresh bean or left to mature for use as a dried bean / legume. While this is a bush bean, it does have the rare, occasional tendency to climb. Easy to shell. Well suited to cooler areas with short growing periods. 75-98 days. 50 seeds

WINDSOR LONG POD Prolific cropping; flat pods 18-20cm. Popular garden variety. Stringless when picked early. 100 seeds

BEAN, CLIMBING

(Phaseolus vulgaris) Requires staking. Bears for later & longer than bush variety. Approx. 5-10 seeds / gram

SOW WHEN

Cool: Mid Spring to Early Summer
Warm: Early Spring to Mid Summer
Tropical: Late Summer to Mid Spring

SOIL

15-30°C

COMPANIONS

LIKES: Beetroot, Borage, Cabbage, Carrot, Cauliflower, Marigold, Squash, Strawberry, Corn, Tomato, Potato, Cucumber, Summer Savory **DISLIKES:** Chives, Fennel, Garlic, Leek, Onion, Gladiolus

1500 YEAR OLD CAVE BEAN Heirloom reputed to have originally been found in a cave in New Mexico in a clay pot sealed with pitch. The bean was then carbon dated & found to be 1500 years old. Very rare variety. Long, wide, flattened green bean produced on trailing vine to 4m high. Strong, sturdy bush. 15 seeds

BLUE LAKE Heirloom dating back to 1885 & developed in the Blue Lake area around Ukiah, California. Straight, stringless bright dark-green round pods 15-18cm. Tender even when mature. Heavy bearing. 65-80 days. 135 seeds

BLUE SPECKLED TEPARY (Phaseolus acutifolius) Ancient heirloom. Small pods producing tan and blue-grey spotted beans which resemble a small pebble. Unique, mild flavour characteristic of traditional Southwestern dishes. Once the main crop in the native cultures of the Sonoran desert and surrounding regions. Very drought & heat tolerant and in many areas may be grown without irrigation. They are of a thin-stemmed sprawling bush to half-runner habit. High yields. A very small and hardy plant which is rewarding to grow. Best left to mature for use as dried bean rather than fresh green bean. 80 days. 100 seeds

CALABRIAN EXPRESS Old Italian heirloom first discovered in Calabria, Italy. Attractive bean best left to mature for use as a dried bean. Ideal for use in soups, stews, salads etc. 25 seeds

CHEROKEE TRAIL OF TEARS Heirloom originating from the Cherokee as they marched from the Smoky Mountains to Oklahoma by the Federal Government in 1839 over the infamous 'Trail of Tears' winter death march which left many dead & suffering. Rare variety. Also known as 'Cherokee Black'. Highly attractive, long, slender, pale green pods with a deep purple line from top to bottom. While it may be eaten as a fresh bean, it is best left to mature for dried use. High yields. Will produce right up until the first frost. 85 days. 35 seeds

KENTUCKY WONDER Heirloom introduced prior to 1864. Also known as 'Old Homestead' & 'Texas Pole'. Round, slightly curved, green bean 15-20cm long with brown seeds. Stringless when young. Heavy producing. Excellent fresh, cooked or frozen. Resistant to bean rust. 58-70 days. 135 seeds

HISTORY

BEAN: Kentucky Wonder

First introduced in 1864 and originally named "Old Homestead". Later renamed "Kentucky Wonder" due to its size which was indeed a wonder. The beans produced were extraordinarily long - up to 25cm and still tender, crisp & free from fibre with excellent flavour. Kentucky Wonder has survived for almost 150 years.

LAZY WIFE Heirloom dating back to 1810 in Germany. Green, round, pods to 20cm long, with little string even when mature. Tall growing bush with high yields over long period. Excellent flavour. 80-85 days 80 seeds

HEIRLOOM MIX Mix of heirloom beets of various colours & shapes including Bulls Blood, Albino, Burpee's Golden Globe, Chioggia, Crosby's Egyptian Flat, Cylindra, Detroit & Early Wonder. 50-65 days. 380 seeds

PURPLE KING Heirloom. Also known as 'Blue Coco'. Straight, flat, bright purple bean to 18cm, heavy bearing, producing over many weeks; changes to green colour when cooked. 65 days. 120 seeds

RATTLESNAKE Heirloom also known as 'Preacher Bean'. Plant to 3m tall with attractive purple flowers producing long, thin green pods with purple streaking and sweet flavour. Beans may also be left to mature, dried and then used in soups and casseroles. Plant to 3m high. High yields. Drought resistant. Does well in hot, humid areas, but also grows well in other areas. 65-75 days. 50 seeds

SNAKE - RED DRAGON (*Vigna sesquipedalis*) Annual. Also known as 'Yard Long Bean' & 'Asparagus Bean'. Long, thin, green bean with red seeds. Grown out from seed obtained from a Vietnamese market gardener. Used fresh in salads, stir-fry, cooked or steamed, with flavour similar to asparagus. In cooler areas plant in warm position. 70-80 days. 45 seeds

SNAKE - RED YARD LONG (*Vigna sesquipedalis*) Bright red, long, thin bean with green centre & nutty flavour when picked young. Easy to harvest & process due to colour & length. Highly attractive in the garden. 50 seeds

SPECKLED CRANBERRY American heirloom dating back to 1796. Highly attractive, long, wide, green, speckled pods containing pink speckled seeds. Harvested fresh or left to mature for use as a dried bean (borlotti). 15 seeds

TURKISH DELIGHT Handed to us by a Turkish man at the Canberra Tip Shop & saved by his family for generations. Large green, stringless, flat pods with excellent flavour. Tender even when large. Strong climber - requires staking. Easy to grow. 35 seeds

WESTRALIA Dates back to 1950's when it appeared in Western Australia. Large, fleshy, dark green, oval shaped pods to 20cm long with white seeds. Vigorous climber. Disease resistant. Well suited to Australian conditions. Early to mature. 65 days. 60 seeds

BEAN, RUNNER

(*Phaseolus coccineus*) Requires staking. Cool climates only. Perennial. Also known as 'Seven Year Bean'. Tolerates heat, drought & cool nights. Approx. 1 seed / gram

SOW WHEN **SOIL TEMP**
Cool: Mid Spring to Early Summer 15-30°C
Warm: Early Spring to Mid Summer
Tropical: NA

COMPANIONS
LIKES: Beetroot, Borage, Cabbage, Carrot, Cauliflower, Marigold, Squash, Strawberry, Corn, Tomato, Potato, Cucumber, Summer Savory **DISLIKES:** Chives, Fennel, Garlic, Leek, Onion, Gladiolus

PRIZEWINNER Heirloom. Long, flat, green, straight, tender pods 20-30cm staying succulent on the vine until harvest. Green beans harvested while young & eaten fresh, or seed left to mature and dry for use as legume. Perennial vine dying back in winter & re-emerging in spring each year. High yields. Cool climate only; tolerates heat, drought and cold climate well.

SCARLET EMPEROR Heirloom. Vigorous vine with scarlet coloured flowers; produces numerous flat, green beans. Best when picked young. Attractive

in the garden. Scarlet Runner first introduced in 1600's. A ceremonial bean used by South West American & Mexican indigenous cultures. Scarlet Emperor dates back to 1906. 65-90 days. 25 seeds

SUNSET RUNNER Perennial - Runner type also known as 'Seven Year Bean. Vigorous vine with salmon coloured flowers; produces numerous large, flat, green beans. Best when picked young. Attractive in the garden. Cool climate only; tolerates heat, drought & cool conditions well. 70-90 days. 12 seeds

WHITE DUTCH RUNNER Heirloom from the Netherlands dating back to 1700's from John Withee's famous bean collection via Old Sturbridge Village. Also known as 'Alba Bean'. Large, thick, green, tender, juicy pods with white beans, produced on fast growing vine with white flowers. Green beans harvested while young & eaten fresh, or seed left to mature and dry for use as legume. Perennial vine dying back in winter & re-emerging in spring each year. High yields. Cool climate only; tolerates heat, drought & cold climate well. 70-90 days. 15 seeds

DID YOU KNOW?

Unlike other beans, the runner bean's cotyledons (seed leaves) remain under the ground as the seedling emerges. Also, the growing vine turns anti clockwise rather than clockwise.

BEETROOT

(*Beta vulgaris*) Biennial. Leaves used in salads or as spinach; roots eaten raw or cooked. Tolerates salty soil conditions and light frost. Approx. 50-60 seeds / gram

SOW WHEN **SOIL TEMP**
Cool: Early Spring to Late Summer 10-30°C
Warm: Mid Winter to Early Autumn
Tropical: Late Summer to Mid Spring

COMPANIONS
LIKES: Bush Bean, Broccoli, Brussel Sprouts, Cabbage, Cauliflower, Kohlrabi, Lovage, Lettuce, Dill, Marjoram, Onions, Peas, Silverbeet **DISLIKES:** Beans, Tomato

ALBINO Originating in Holland. Pure white, round root with tender, mild flavour. Slightly sweeter than red varieties. Green leaves also used like spinach. Stores well in ground. 55 days. 150 seeds

BULL'S BLOOD American heirloom from the Victorian era, originally grown for its attractive leaves only. Attractive deep-red foliage with dark red root & internal rings. Excellent variety for 'baby beets'. 35-55 days. 250 seeds

BURPEE'S GOLDEN GLOBE Heirloom first introduced by W. Atlee Burpee Company in 1828. Dark, golden coloured roots with deep yellow, tender & mild flesh; green leaves with yellow stems. Does not 'bleed' like red types making it ideal for salads. Hardy. 55-60 days. 80 seeds

CHIOGGIA Italian heirloom dating back to the mid 1840's. Nicknamed the 'Candycane Beet'. Dark red outer skin with alternating pink & white rings inside. Quick growing; competes well with weeds. Excellent sweet flavour. Does not 'bleed' like other varieties. Good for cool areas. 50-65 days. 400 seeds

DID YOU KNOW?

Each beetroot seed is actually a cluster of embryo's that can produce potentially

from 3-5 plants. This could be the reason for a number of plants appearing in the one spot.

CROSBY'S EGYPTIAN FLAT Heirloom dating back prior to 1885 and named after Josiah Crosby, a Boston market gardener. Purplish red, flattened root which forms largely above the ground. Rich flavour. Ideal for boiling, pickling, baking & freezing. 50-60 days. 450 seeds

CYLINDRA Heirloom first introduced from Europe in 1892. Also known as 'Butter Slicer'. Long cylindrical root 15-25cm, uniform dark red, excellent for slicing. Small reddish-green tops. Bolt resistant. 45-80 days. 350 seeds

DETROIT DARK RED Heirloom introduced by D M Ferry & Co in 1892. Globe shape, dark-red roots to 80mm. Resistant to downy mildew. Excellent flavour. Stores well. 45-70 days. 200 seeds

EARLY BLOOD TURNIP One of the oldest surviving varieties from 18th century England. When cooked, the root gives off a thick, red juice which is similar to blood - hence the name. Dark red, turnip shaped roots with sweet, dark flesh & pink zoning. 48-68 days. 180 seeds

EARLY WONDER A descendant of the 19th Century 'Early Blood Turnip'. Also known as 'Green Top Bunching'. Flattened red globe bulbs, with light zones. Bright green tops. Quick growing. Excellent flavour. First introduced in 1911. 40-60 days. 350 seeds

RECIPE

Beetroot Coffee

A sweet, thick, warming drink, similar to Turkish Coffee. Use fresh for maximum flavour.

STEP 1: Peel beetroot, cut into quarters & dry in cool oven or dehydrator until crisp (12-24 hours).

STEP 2: Grind in blender or coffee grinder. Must be thoroughly dry to grind well.

TO SERVE: Place 2 teaspoons granules in mug, add 1 cup boiling water & leave for 2 minutes. Strain & drink. Colour should be brown & not red.

FODDER BEET - MAMMOTH MIX Also known as 'Mangel' & traditionally widely used across Europe as cattle feed as early as 1500's. Includes Red Mammoth, Giant White & Yellow Eckendorf. Abundant, edible leaves with very large root up to 10kg or more. Leaves used in salads or like spinach. Root when harvested young used in salads or cooked. 300 seeds

HISTORY

Beetroot has been cultivated since the time of early Greece & Rome, when white beetroot had as equal popularity as the red variety.

Early beetroot were long & carrot like in appearance with the round beetroot becoming popular during the late 19th & 20th Century.

GOLDEN DETROIT Large, golden orange,

rounded roots with similar flavour & texture as red beetroot but do not bleed when cut. Sweet when harvested at any stage. Yellowish flesh turns golden yellow when cooked. Stems & leaves used in salads when young or steamed when harvested later. Slow to bolt. Stores well. 55 days. 160 seeds

HEIRLOOM MIX Mix of heirloom beets of various colours & shapes including Bulls Blood, Albino, Burpee's Golden Globe, Chioggia, Crosby's Egyptian Flat, Cylindra, Detroit & Early Wonder. 50-65 days. 380 seeds

MANGEL WURZEL European heirloom dating back to 1767. Also known as 'Mangold' or 'Mangel Beet'. Large, oval root up to 24kg with orange-yellow skin, white flesh & tender, broad, green leaves. Both root & leaves used, with leaves making an excellent spinach substitute. Root used in cooking as a potato substitute either boiled, baked, mashed etc; also has an interesting history of being used during the 18th century to brew beer. 160 seeds

WHITE DETROIT Heirloom, large, white root which retains sweet flavour while cooking. A great choice for avoiding 'staining' from beet juices with salads & cooked dishes. 180 seeds

BROAD BEAN

(Vicia faba) Withstands heavy frost. Use fresh or as dried bean. Leaves also make a tasty addition to salads, or used like spinach. Approx. 1 seed / gram

BROCCOLI RAAB - SPRING RAPINNI

A descendent of a wild herb & a relative to the turnip with flowering heads similar in shape to classic broccoli. Commonly used in Southern Italian dishes, sauteed, steamed or used like spinach. Nutty, slightly bitter, pungent flavour. High in nutrients. For best results, harvest leaves up to 25cm. 45 days. 600 seeds

DI CICCIO Heirloom. Tight, compact, bluish-green heads, producing many side shoots. Stores well. Produces earlier than most varieties. Popular variety. 50-80 days. 600 seeds

GREEN SPROUTING CALABRESE

Italian heirloom introduced prior to 1880. Compact, dark-green head. Bush continues producing side heads once main head is harvested. Slow to bolt. 60-90 days. 1100 seeds

PURPLE SPROUTING EARLY English heirloom dating back to mid 1777. Grown for the harvest of its tasty, purple side shoots which turn green upon cooking. Very hardy & prolific. Allow 9 months until maturity. 500 seeds

ROMANESCO Italian heirloom. Medium sized, light green head, with spiraling pattern. Attractive variety with excellent taste & flavour. Flowers also used in salads & as garnish. Widely grown & prized in Italy. 70-100 days. 480 seeds

SPIGARIELLO LISCIA Italian heirloom most popular in Southern Italy. Flat, blue - green leafy vegetable with flavour similar to broccoli / kale. Harvest outside leaves as required or whole plant for bunching. If left to mature, will form small broccoli-like heads after 70 days. Easy to grow. Will tolerate warmer conditions without bolting much better than regular broccoli. High yields. 45-70 days. 400 seeds

WALTHAM 29 First introduced in 1954. Medium to large heads 15cm across on compact plants, ideal for smaller gardens. Excellent flavour. Good variety for freezing. Drought tolerant. 60-70 days. 1200 seeds

WHITE SPROUTING Heirloom. Creamy, white, tender flower heads with mild flavour. Prolific. Eat white flower head & surrounding leaves as well as stem. Harvest central flower head first to encourage side shoots. Early variety. 65-72 days. 120 seeds

BRUSSEL SPROUTS

(Brassica oleracea var. gemmifera) Light frost improves flavour. Approx. 270-325 seeds / gram

DISLIKES: Potato, Dill, & being stored with apples	

AMSTERDAM FORCING Heirloom. Orange, almost coreless, blunt-ended, cylindrical roots 13-15cm in length. Ideal for baby carrots. Resistant to splitting & cracking. 55-72 days. 1800 seeds

CHANTENAY RED CORED French heirloom first introduced in the late 1800's. Short,

broad, deep red-orange root. Well suited to heavier soils. Sweet flavour & very tender. 60-75 days. 2800 seeds

DANVERS Heritage variety originating from Danvers, Massachusetts in the 1870's. Produces deep orange, slightly tapered root 15-18cm. Tolerates a wide range of soils. Stores well. Excellent variety. Great for juicing, cooking, freezing or salads. 65-70 days. 1800 seeds

HEIRLOOM MIX Mix of many varieties of carrots in our range with varying colours, sizes, and shapes. 1200 seeds

PURPLE DRAGON Originating from Afghanistan & over 1000 years old. Medium length, tapered root, in shades of dark violet through to reddish purple with an orange interior. Sweet taste. 60-90 days. 1000 seeds

ROYAL CHANTENAY Heirloom originating from the Chantenay region in France. Red-orange, large diameter root 12-16cm. Excellent variety for heavy or shallow soils. 60-70 days. 1800 seeds

SCARLET NANTES French heirloom dating back to 1855. Reddish orange, cylindrical, almost coreless, sweet, crisp roots to 17cm, with excellent flavour. Stores well. Used raw, cooked, or juiced. Contains the highest number of amino acids found in nutritional research. 55 days. 2000 seeds

WHITE BELGIAN Flemish heirloom dating back to 1500's. Biennial. Tapered, long white root with green shoulder. Mild, sweet flavour with crisp flesh. Attractive when served with orange carrots, or as a white carrot soup. 60-75 days. 1000 seeds

HISTORY

Did you know that the original carrot was white & not orange? The Celts in Northern Europe grew carrots that were white. Afghanistan, Syria & Iran grew yellow or purple carrots. Our sweet, deep orange carrots of today were first developed in Holland during the 1600's, then moving to America with the first settlers.

Also, in the Middle Ages, French women cut the feathery greens from carrots to adorn their hats and hair styles.

CAULIFLOWER

(Brassica oleracea var. botrytis) Approx. 325-500 seeds / gram

SOW WHEN	SOIL
TEMP	
Cool: Late Spring to Mid Summer	9-30°C
Warm: Early Summer to Early Autumn	
Tropical: Mid Summer to Mid Autumn	
COMPANIONS	
LIKES: Bean, Beetroot, Celery, Chamomile, Dill, Hyssop, Mint, Nasturtium, Onion, Oregano, Potato, Sage, Radish, Rosemary	
DISLIKES: Strawberry, Tomato	

GREEN MACERATA Heirloom. Lime green coloured cauliflower, 1-1.3kg. Excellent flavour; very tender. Unusual & attractive in the garden. 80-90 days. 450 seeds

GIANT OF NAPLES Rare Italian heirloom. Large, white head up to 1.8kg with very good leaf cover. Good texture & flavour. Hardy. 200 days. 600 seeds

SELF BLANCHE Small to medium, white heads 17-20cm across, excellent flavour. In cool weather, leaves curl over head to keep white. 70 days. 600 seeds

VIOLET SICILIAN Heirloom dating back to 1800. Large, solid, purple heads changing to green when cooked. Higher in minerals than other varieties. Insect resistant. 450 seeds

CELERIAC

(Apium graveolens var. rapaceum) Bulb, stems & leaves used. Will grow into cold weather. Use raw in salads, or cooked in soups & stews. Much harder than celery. Approx. 2000-2500 seeds / gram

SOW WHEN	SOIL
TEMP	
Cool: Early Spring to Early Summer	8-20°C
Warm: Late Winter to Late Summer	
Tropical: Mid Summer to Mid Autumn	
COMPANIONS	
LIKES: Bush Bean, Cabbage, Leek, Onion, Tomato, Chive, Broccoli, Cauliflower, Kale, Kohl Rabi	

GIANT PRAGUE Heirloom dating back to 1871. Very large, smooth bulbous roots with white flesh. Excellent sweet flavour. 1200 seeds

SEDANO DI VERONA Heirloom. Also known as Turnip Rooted Celery. Brown bulb with white centre; up to 2kg in weight. Slow to bolt. 1000 seeds

WHITE ALABASTER Rare Italian heirloom. Large, white head up to 1.8kg with very good leaf cover. Good texture & flavour. Hardy. 200 days. 1000 seeds

CELERY

(Apium graveolens var. dulce) Will grow into cold weather. Approx. 2000-2400 seeds / gram

SOW WHEN	SOIL
TEMP	
Cool: Early Spring to Early Summer	10-20°C
Warm: Late Winter to Late Summer	
Tropical: Mid Summer to Mid Autumn	
COMPANIONS	
LIKES: Bean, Cabbage, Leek, Onion, Tomato	

CUT European, dwarf celery. Rich, dark green leaves with thin stems & strong celery flavour; height to 45cm. Ideal for growing in pots or small gardens. Will keep producing after cutting. Hardy; tolerates wider growing conditions than regular celery. 80-85 days. 4000 seeds

ELNE French heirloom. Crisp, medium to tall, bright green stems with dark green leaves. Easy to blanch due to tight growth - if left to themselves are somewhat self-blanching. Early to mature. 80 days. 2000 seeds

PEPPERMINT STICK Attractive, pink & green striped stems with thin stalks & intense flavour. Unique in that it keeps its colour when cooked. Use leaves & stems in soups, stews, salads or just fresh. Vigorous & upright plant. Very slow to bolt. Shade tolerant. Harvest outer stalks straight from the bush allowing inner stems to develop for later use. 100-120 days. 2000 seeds

TALL UTAH Stringless, dark-green, stalks to 65cm. Vigorous. 70-125 days. 4000 seeds

HINT

To prevent celery becoming thin & stringy, keep well watered and fed with an organic fertiliser.

RECIPE Celery Salt

Celery is naturally salty and can be used as a salt substitute.

STEP 1: Slice celery thinly and dry in cool oven or dehydrator.

STEP 2: Blend in blender or coffee grinder until powdered.

CHICORY

Approx. 500-600 seeds / gram

SOW WHEN	SOIL TEMP
Cool: Early Spring to Late Summer	15-26°C
Warm: Late Winter to Early Autumn	
Tropical: Early Autumn to Early Spring	

COMPANIONS

LIKES: Pennyroyal, Cauliflower, Lettuce, Mint, Parsley, Chervil. Chicory aerates the soil & brings nutrients to the surface.

GIANT CHIOGGIA Italian heirloom. Long, green indented leaves with mild flavour. Young leaves used in salads or cooked like spinach. Mature plants great for boosting nutrient intake for grazing animals including cows, sheep, pigs, chooks & rabbits. 1000 seeds

ITALIKO ROSSO Italian heirloom. Deeply toothed, upright, bright red-veined green leaves. A savoury leaf resembling 'Red Rib' Dandelion in appearance. Ideal for adding to mesclun. Best harvested in cooler weather as summer heat may create bitterness. 60 days. 800 seeds

WITLOF (*Chicorium intybus*) Heirloom from Belgium in mid 1800's. Also known as 'Belgian Endive' meaning 'White Leaf'. Medium-dark green leaves, with inner leaves & hearts used in salads. Plants 40-50cm. Delicious mildly tangy flavour. Roots dried & roasted for coffee substitute. 55-150 days. 1200 seeds

CHILLI

(*Capsicum annum*) Grow in similar conditions to Capsicum. Annual in cooler areas, perennial in warm areas. In cool areas, seeds may be started indoors 5 weeks prior to planting out after last frost. Approx. 120-150 seeds / gram

SOW WHEN	SOIL TEMP
Cool: Early Spring to Late Spring	16-35°C
Warm: Late Winter to Early Summer	
Tropical: Mid Winter to Early Autumn	

COMPANIONS

LIKES: Basil, Carrot, Lovage, Marjoram, Onion, Oregano
DISLIKES: Fennel, Kohl Rabi

CAYENNE European heirloom first introduced in 1827. Long, thin, cylindrical, green to red fruit to 20cm with pointed end. 60 seeds

Heat unit 8 - 1 (mild) to 10 (hottest)

JALAPENO Annual / Perennial. Small, oval, fruit with thick, firm flesh to 75mm. Ripens dark green to

red. Low to medium heat. Popular variety. High yields. 60-80 days. 80 seeds

Heat unit 5 - 1 (mild) to 10 (hottest)

POBLANO / ANCHO Heirloom from Mexico and the most commonly used dried chilli in this region. The 'Poblanos' (meaning 'People chilli') when dried is then called 'ancho'. A heart shaped, thick walled, mildly hot fruit with rich mellow flavour. Ripens from deep green to rich red. May be eaten raw, peeled, cooked in dishes or stuffed. Well suited to warm areas. Plants to 60cm high. 80 days. 60 seeds

Heat unit 4 - 1 (mild) to 10 (hottest)

SERRANO Heirloom originating from the foothills of Puebla, Mexico with the name taken from 'Serranias' which means foothill in Spanish. Perennial - annual in cool areas. Fruit with thin skin 5-8cm long with thick flesh, and colour ranging from green (unripe) to red, brown and then orange as fruit ripens. Medium to hot heat. Plant to 1m high. Prolific. Produces over a long period. Used in salsa, pickled, cooked dishes or dried as ornamental. 75 days. 80 seeds

Heat unit 7 - 1 (mild) to 10 (hottest)

DID YOU KNOW.....

Did you know that chillies harvested from the same parent bush can vary in heat intensity, with the hottest fruit being at the bottom of the plant.

CHINESE / ASIAN VEGETABLES

Quick growing. Use fresh in salads or stir-fry. Harvest leaves as required.

BABY BOK CHOY Dark green leaves with short, wide stems; mustardy flavour. Smaller, more tender & milder than regular Bok Choy. Likes cooler weather. Harvest whole plant for use in stir-fry, or pick outside leaves as required. Great for small gardens. 800 seeds

GAI CHOI Asian heirloom also known as 'Chinese Mustard', 'Swatow Mustard Greens', 'Mustard Cabbage' or 'Indian Mustard'. Deep green, crinkled, broad cabbage-like leaves with thick ribs & veins and very mild, sweet flavour. Popular in Taiwanese cuisine. Harvest baby leaves when young (after 21 days) or leave to mature. Prefers warm, humid conditions. Quick to grow. May be grown as green manure crop, as a soil fumigation treatment, or even to help remove heavy metals from the soil. 500 seeds

HONG VIT (*Raphanus sativus*) Heirloom radish grown mainly for its leaf as it produces only small roots. Green, lobed leaf with attractive pink stem and spicy flavour. Plant to 15cm high. Ideal for use as micro green or for continual harvest of baby leaves to add to salad mixes, soups and stir-fry. Fast growing and very early to mature. 180 seeds

PAK CHOI

Approx. 350 seeds / gram

SOW WHEN
Cool: Late Winter to Early Autumn
Warm: Mid Winter to Mid Autumn
Tropical: Early Autumn to Mid Spring

PURPLE Heirloom. Also known as 'Hon Tsai Tai'. Quick growing, Chinese vegetable, producing deep purple stalks. Attractive in the garden. Under ideal conditions, plant will produce as many as 36 purple flowering stems. 30-50 days. 550 seeds

WHITE STEM Thick white stems with large, flat, round, smooth, green leaves. Popular variety. 35-45 days. 1800 seeds

TATSOI Heirloom. Open-hearted, dark-green, tender leaves with mild taste. Harvest leaves from outside edge as required. Tolerates cooler conditions. 45-55 days. 1000 seeds

TATSOI - YUKINA SAVOY Thick, dark green, heavily crumpled, oval leaves. Similar in appearance to regular Tatsoi, but with more crumpled leaves. Quick to grow. Heat & cold tolerant. Harvest as baby leaf removing from outside edge as required, or leave to mature. Popular in salads, or stir fry. 21-45 days. 700 seeds

COLLARDS

(*Brassica oleracea* var. *acephala*) Tolerates cooler weather. Flavour sweetens with frost. Thrives in soils where other members of the cabbage family struggle. Juicy leaves with mild cabbage-like flavour. Used in salads, boiled or steamed. Approx. 200 seeds / gram

SOW WHEN	SOIL TEMP
Cool: Mid Summer to Mid Autumn	8-28°C
Warm: Late Summer to Early Spring	
Tropical: Mid Autumn to Early Spring	

COMPANIONS

DISLIKES: Grape, Strawberry, Tomato

GEORGIA SOUTHERN Heirloom dating back to 1880. Also known as 'Creole' or 'True Collard'. Large, blue-green, slightly crumpled leaves. Non-heading. Grows to 90cm. Slow to bolt. 60-80 days. 600 seeds

MORRIS HEADING Heirloom first introduced in 1919 by Morris Plant Farm. Broad, slightly crumpled, waxy, blue-green leaves with light green veins. Extremely tender variety. Compact bush. Slow to bolt. 52-85 days. 600 seeds

CORN

(*Zea mays*) Approx. 3-8 seeds per gram.

SOW WHEN	SOIL TEMP
Cool: Mid Spring to Early Summer	15-35°C
Warm: Late Winter to Mid Summer	
Tropical: Mid Winter to Late Summer	

COMPANIONS

LIKES: Bean, Lupin, Melon, Pea, Squash, Cucumber, Pumpkin, Potato

AUNT MOLLY'S FAVOURITE *NOT TO NT***** Golden yellow, rounded kernels produced on large bush with numerous small to medium sized cobs. High yields. Used for popping. 120 seeds

BALINESE *NOT TO NT***** Pale golden yellow kernels produced on heavily foliated plant to 2m tall. 2-3 cobs per plant. Popular variety - easy to grow. 85-110 days. 80 seeds

GOLDEN BANTAM ***NOT TO NT***

American heirloom dating back to 1898. Plant to 4m high, producing up to seven, golden yellow cobs per stem. Great flavour. Ideal for eating fresh, cooked or for freezing. 70-80 days. 65 seeds

JOLLY ROGER *NOT TO NT***** Australian heirloom producing large cobs with high sugar content. Excellent flavour. High yields. 80 seeds

MANDAN MAIZE *NOT TO NT***** Heirloom originating from North & South Dakota & traditionally grown by the Mandan Indians. Highly attractive, deep blue-purple cobs. A hard corn with kernels used mainly for grinding into flour. Ideal for purple tortillas, flat breads etc. Very easy to grow & drought resilient. Ideal for cooler areas. 65 seeds

ONTOS OVAL *NOT TO NT***** Heirloom. Beautiful, elongated pale yellow to almost white kernels produced on fast growing plant to 1.5m high. A favourite with popcorn enthusiasts - as one fan states 'mostly puff with little rough'. Organically grown. 80 seeds

REID'S YELLOW DENT *NOT TO NT***** Heirloom first released by Robert Reid of Illinois in 1847 & improved by his son James Reid from 1870-1900. At the time, James Reid harvested 120 bushels per acre (the average at the time being 27 bushels). This then became the famous 'Reid's Yellow Dent Corn'. 60 seeds

TRUE GOLD *NOT TO NT***** Heirloom. Golden yellow kernels with crisp, rich, sweet buttery flavour. Ready to eat straight off the plant. Cobs up to 20cm long produced on plant to 2m high. 2-3 cobs per plant. Early to mature. Grows well in cooler areas. 80-90 days. 50 seeds

DID YOU KNOW.....

Heirloom varieties of corn are naturally sweet, but their sugar content quickly turns into starch after picking, so is best eaten freshly harvested.

CUCUMBER

(Cucumis sativus) Approx. 35-40 seeds / gram

SOW WHEN	SOIL
TEMP	
Cool: Mid Spring to Early Summer	15-35°C
Warm: Early Spring to Mid Summer	
Tropical: Mid Winter to Early Autumn	

COMPANIONS

LIKES: Bean, Broccoli, Celery, Chinese Cabbage, Lettuce, Pea, Radish, Tomato, Corn, Sunflower
DISLIKES: Rue, Sage, Potato & Aromatic Herbs

APPLE-O-DAY Round to oval, pale green, apple type fruit. Best harvested when young for most tender fruit & fresh eating, otherwise larger fruit may be sliced and used in salads, sandwiches etc. Mature fruit may also be seeded with the flesh then steamed creating the most tender, asparagus flavoured vegetable. Very high yields. 45 seeds

ARMENIAN (Cucumis melo) Heirloom. Also known as 'Yardlong Cucumber'. Light-green, ribbed, cylindrical fruit 20-60cm. Thin, soft skin, so no need for peeling. Best results when grown on trellis. Grows quickly. 50-80 days. 100 seeds

BEIT ALPHA Lebanese type, green cucumber up

to 16cm long with excellent, sweet flavour & texture. Commonly harvested when young & small. 60 days. 45 seeds

EARLY FORTUNE First introduced in 1910 by the Jerome B. Rice Seed Co. Described as being 'the earliest and best white spine cucumber ever offered'. Green, medium sized fruit to 20cm. 55-60 days. 40 seeds

MARKETMORE Heirloom. Burpless type. Cylindrical fruit with dark green skin & white, non-bitter flesh. Resistant to disease. 60-70 days. 100 seeds

MOUSE MELON (Melothria scabra) Heirloom native to Mexico & Central America & first described scientifically in 1866 by the French Botanist Charles Victor Naudin. Also known as 'Mexican Sour Gherkin' or 'Sandiita' meaning 'Little Watermelon' in Spanish, but also appears many times in other dialects translating as 'Mouse Melon'. Small, tiny, grape sized fruit the size of a thumb with flavour similar to a cucumber / lime. Flavour varies depending on time of harvest. When picked young & still on vine flavour resembles cucumber, but when left to mature with fruit falling on ground, fruit will display a hint of sourness. Best grown on a trellis. Used in stir-fry, pickled, raw in salads, or chopped added to salsa for extra flavour & texture. 180 seeds

MUNCHER BURPLESS Medium, smooth, lebanese type fruit to 25cm long with thin skin produced on strong, vigorous vines. Burpless, tender & bitter-free. Used fresh in salads, or when harvested young may also be pickled. Slices well. High yields. Resistant to disease. Early variety. 59-65 days. 45 seeds

POINSETT 76 Released in 1976 by the late Dr. Munger of Cornell. Green, cylindrical, straight fruit to 20cm in length with juicy, crunchy flesh. Disease resistant - withstands spider mites, downy mildew, powdery mildew, scab, angular leaf spot and anthracnose. Excellent slicing cucumber for use in salads. 70 days. 45 seeds

POONA KHEERA Heirloom originating from India. Large, dark brown skin with crisp, juicy, white flesh with sweet flavour. Early to ripen - great for cool areas with a short growing season. High yields. Harvest young when small with white skin or leave to mature allowing skin to develop into a deep brown. May be grown along ground or with trellis. 60 days. 35 seeds

REDLANDS LONG WHITE Australian cucumber with white skin & delicious, deep cucumber flavour not commonly found in supermarket varieties. Grows to 18cm in length & approx. 6cm across. High yields. Great in salads or pickled. Resistant to powdery mildew. 63-70 days. 35 seeds

RICHMOND RIVER GREEN APPLE Australian heirloom. Oval green fruit to 12cm in length with crisp, juicy, white flesh resembling a green apple in appearance with no bitterness characteristic of many cucumber varieties. Low acid variety. High yields with over 10kg per plant. Spreading vine. 70 days. 35 seeds

STRAIGHT EIGHT Straight, dark green, cylindrical fruit with blunt ends 15-18cm. Pick young for pickling or leave to mature for use in salads etc. Prolific. Dates back prior to 1935. 58-70 days. 65 seeds

SYRIAN Pale, light green, crisp fruit to 25cm long maturing to pale yellow. Excellent flavour and texture. Tiny black spines easily rub off without pricking! Trailing vine best grown on a trellis. Best harvested when young but may be left to mature. Good for eating at all

stages. 35 seeds

WHITE WONDER Heirloom dating back prior to 1890 & first introduced by W. Altee Burpee of Philadelphia. Also known as 'Long White'. Ivory white, cylindrical fruit to 15cm long with rounded ends & crisp, firm, mild flesh. Colour of fruit changes to ivory-yellow when past maturity. Vigorous vine. High yields even during hot weather. Used raw, for pickles or slicing. 35-60 days. 50 seeds

DID YOU KNOW.....

Did you know that cucumber flowers are only open for one day & require as many as 20 insect visits before being pollinated.

EGGPLANT

(Solanum melongena) Best sown in warm, relatively dry spot in the garden, with similar growing conditions as for tomato.

SOW WHEN	SOIL
TEMP	
Cool: Mid Spring to Late Spring	24-32°C
Warm: Early Spring to Early Summer	
Tropical: Early Spring to Early Autumn	

BLACK BEAUTY Heirloom dating back to 1875. Large, oval, dark purple fruit. Excellent flavour & texture. Plant height 70-80cm. Produces 8-18 fruit per plant. Early, popular variety. 75-80 days. 180 seeds

FLORIDA MARKET Rare, heirloom. Medium to large, oval - teardrop, black/purple fruit. Vigorous plant. High yields. Produces over a long period. Use sliced, stuffed or baked. 80-85 days. 200 seeds

LONG PURPLE Italian heirloom also known as 'Early Long'. Long, slender, purple, thin-skinned fruit with milder more delicate flavour than other varieties & few seeds. Bitter free. Produced on tall bushes (staking is recommended). Early variety great for short growing seasons. 80-90 days. 140 seeds

ENDIVE

(Chicorium endiva) Also known as 'Escarole'. Leaves used in salads or boiled / steamed. Tolerates frost. Approx. 500-900 seeds / gram

SOW WHEN	SOIL
TEMP	
Cool: Early Spring to Late Summer	15-25°C
Warm: Late Winter to Early Autumn	
Tropical: Early Autumn to Late Winter	

BROADLEAF BATAVIAN Heirloom introduced prior to 1860. Large, dark green, broad, slightly twisted leaves up to 40cm across with deep, self-blanching, buttery, creamy white heart. 85 days. 1000 seeds

PANCALERI FINE Heirloom. Attractive, heavily serrated, dark green leaves, with a creamy white heart. Self-blanching. Has mild, slightly nutty flavour. 1000 seeds

RUFFEC GREEN CURLED Heirloom dating back to 1863. Open hearted, deeply indented & curly green leaves. Inner leaves blanch easily to creamy-white. 70-100 days. 1500 seeds

DID YOU KNOW.....

Did you know endive is best when harvested after long periods of cool or cold weather. The plant increases its sugar content to stay warm, thereby reducing its bitterness & increasing its sweet flavour.

FENNEL

(Foeniculum dulce) Approx. 500 seeds / gram

SOW WHEN

Cool: Late Winter to Early Autumn

Warm: Mid Winter to Mid Autumn

Tropical: All Year

COMPANIONS

LIKES: Bean, Caraway, Coriander, Dill, Tomato

FLORENCE (NOT TO WA, VIC) Forms a large, flattened, cream colour bulb at base of plant; leaves fine & ferny. Leaves & bulb used to add liquorice flavour to salads & dishes. 65-100 days. 350 seeds

GOURD

(Lagenaria saccharia) Annual vine. Stake for best results. Eaten when young, or allowed to mature for use as vessel. Approx. 30 seeds / gram

SOW WHEN

TEMP

Cool: Early Spring to Early Summer

Warm: Late Winter to Late Summer

BITTER MELON - BITTER LONG Also known as 'Bitter Melon', 'Karalla' & 'Balsam Pear'. Pale green, heavily warted fruits with tapered ends & crisp, tender texture. Best harvested young from 25cm. Vigorous climbing vine requiring trellis. Popular in Indian dishes. Prefers warm climates with warm, moist soil to germinate. 60-70 days. 8 seeds

DINOSAUR Also known as 'Maranka' or 'Swan Gourd'. Large, dark green fruit up to 60cm long with curved necks, oval bowl & pronounced ridges. Historically used to decorate sweat lodges. Best grown on trellis. 125 days. 15 seeds

ORNAMENTAL - LARGE MIX Annual. Vine. Mix of around 6 different large varieties, including Crown of Thorns, Mini Bottle, Pear White, Spoon etc. 90-100 days. 15 seeds

ORNAMENTAL - SMALL MIX (Cucurbita species) Annual vine. Mix of around 6 different small varieties. 90-100 days 20 seeds

SPECKLED SWAN Birdhouse type gourd with small 'bulb' at top resembling the head of a swan. 12 seeds

SPINNING (Cucurbita pepo) Also known as 'Dancing Gourd'. Very small, dark green fruit with light green stripes produces a hard shell when dried. Used as decoration or toy. In the past, school children would carry the dried gourds in their pockets and spin them on their desks. 90-100 days. 25 seeds

TEN COMMANDMENTS (Cucurbita pepo) Also known as 'Crown of Thorns'. Softball sized,

multicoloured fruit with ten fingers (hence the name) pointing towards the blossom end. Produces a mixture of bright stripes & colours. Highly decorative. Excellent for making crafts. 95 days. 18 seeds

TURK'S TURBAN (Cucurbita maxima) French heirloom dating back to 1817. Fruit with distinctive top cap & unusual orange, red, white & green marking on skin; 15-20cm across. Trailing vine to 3m. Use as decoration. Stores well. 80-100 days. 12 seeds

CANARY YELLOW Large, bright yellow, slightly elongated melon with pale green (almost white), firm flesh & flavour reminiscent of a fruit salad. Shape resembles a football. Flavour is exceptionally sweet when fully ripe. Good yields. Very popular in Spain. Best harvested when melons are bright yellow, the rind is slightly waxy and the flower end is springy, not spongy. 104-120 days. 35 seeds

EARLY HANOVER Heirloom first introduced in 1895 by T. W. Woods & Sons from Virginia. Medium sized, globe shaped, indented fruit to 1.5kg with sweet, sugary flesh that can be eaten right to the rind. High yields. Extra early variety. 70-85 days. 40 seeds

EDEN'S GEM Heirloom from Colorado & dating back to 1905. Also known as 'Rocky Ford Green Flesh' or 'Netted Gem'. Small, round, netted fruit the size of a softball. Spicy, sweet flesh. Early to mature; great for short growing seasons. 60-85 days. 30 seeds

GREEN NUTMEG Heirloom described by Fearing Burr in 1863 in his book 'Fruit and Vegetables of America' as a variety that had already been in cultivation a very long time. Medium sized melon with heavily netted skin. Rich sweet spicy flesh with strong aroma. Prolific variety yielding 4-5 melons per plant. Early variety good for cooler areas with short growing seasons. 80-85 days. 45 seeds

HA'OGEN Heirloom originating from Hungary. This melon was later shipped to Israel by Hungarian Jews where it was mistakenly believed to have originated. Smooth, speckled green fruit up to 1.5kg with sweet, creamy, spicy green flesh. Skin changes from green to yellow-pale orange when mature. Produced on vigorous vines with up to 10 fruit per plant. Early to mature. Ideal for cool areas with short growing seasons. 80-90 days. 35 seeds

MANGO Heirloom first discovered in China & introduced onto the market in the 1880's. Also known as 'Vine Peach' or 'Vegetable Orange'. Fruit the size of a peach & appearance & texture of a mango. Not as full flavoured as other melons (quite bland) with a slight tartness. Ideal for making fruit wine, and as a substitute for apples in 'apple' jelly, lemons in 'lemon' butter or for sweet or spicy pickles. May also be sliced & fried like eggplant. Prolific. Easy to grow. Best grown on trellis. Drought tolerant. Stores well. 80-90 days. 60 seeds

PIEL DE SAPO Spanish heirloom also known as 'The Santa Claus Melon' or 'Christmas Melon'. Its

name is derived from its blotched green skin which in Spanish is translated as 'Toad Skin'. Its English name 'Christmas Melon' is in recognition of its long storage ability, staying viable 'until Christmas' in the northern hemisphere. Large long & oval shaped melon up to 30cm across with thick, green striped outer rind and pale green to white, sweet inner flesh. Because of the melon's thick skin, it does not release the tell-tale aroma when ripe, but rather becomes soft and vibrant yellow at the blossom end. 60 seeds

KALE

(Brassica oleracea var. acephala) Tolerates cooler weather - mature plants tolerate frost. Pick whilst young for use in salads, or leave to mature for use like cabbage. High in nutrients. Use in salads, stir-fry or cooked. Excellent poultry feed. Approx. 250 seeds / gram

SOW WHEN

TEMP

Cool: Early Spring to Early Winter

Warm: Early Spring to Early Winter

Tropical: Mid Autumn to Early Spring

SOIL

8-28°C

COMPANIONS

LIKES: Bean, Beetroot, Celery, Chamomile, Dill, Hyssop, Mint, Nasturtium, Onion, Oregano, Potato, Sage

DISLIKES: Grape, Strawberry, Tomato

DWARF BLUE CURLED Heirloom. Heavily curled, light green leaves with bluish tinge & short, white stems. Hardy, low growing plant to 30cm. Great for growing in pots or the small garden. 50-60 days. 800 seeds

EARLY HANOVER Also known as 'Premier'. Heirloom. Attractive plant with copious amounts of flavourful, smooth green leaves with scalloped edges. More smooth and tender than other kale varieties making it ideal for juicing, salads etc. Vigorous & fast growing. Early variety. 60 days. 600 seeds

GREEN COSSACK Heirloom. Broad, feathered greyish blue/green with greenish white veins. Sweet & tender when harvested young. Very cold tolerant. 1000 seeds

LACINATO Italian heirloom dating back to 1825. Also known as 'Black Cabbage' or 'Tuscany'. Plant forms no central head but rather grows upwards like a palm tree - pick leaves as required. Plant height to 1.5m. Leaves are narrow, crinkled, dark green & highly nutritious. Plant will continue to grow even when covered with snow. 600 seeds

RED RUSSIAN Russian heirloom. Also known as 'Ragged Jack'. Rare, attractive variety. Red frilly, oak-shaped leaves with purple veins; bitter free. Hardy variety. 55 days. 600 seeds

DID YOU KNOW.....

With the onset of cool weather, kale plants lose their chlorophyll which makes them appear green, to reveal hidden colours such as pink, lavender, red & purple.

SIBERIAN Extremely hardy. Quick growing. Large, blue-green, slightly curled leaves, shaped like a feather. Non-heading. Grows to 40cm. Tolerates cooler weather. Use raw in salads, or cooked. Excellent poultry feed. 60-70 days. 350 seeds

SQUIRE Heirloom. Annual. Heavily fringed/curled blue/green leaves. Attractive variety. Sweet & tender.

Slow to bolt. Tolerates cooler weather. Use raw in salads, or cooked. Excellent poultry feed. 60-70 days. 600 seeds

VATES BLUE CURLED A type of Scotch Kale. Vigorous plant to 40cm high with heavily curled, blue-green leaves on short stem. Rich in vitamins. Withstands cold weather. Does not yellow with frost or heat. 55 days. 1000 seeds

DID YOU KNOW.....

The leaves of kale & collards toughen as they mature. For salad use, it is best to select the smaller, younger leaves, with larger leaves to be left for cooking like cabbage or spinach.

KOHL RABI

(Brassica oleracea var. gongylodes) Used in salads, steamed or baked. Small tops used in salads when young. Best picked early from 6cm diameter. Approx. 250-320 seeds / gram

ANNA SWARTZ HUBBARD (*Cucurbita maxima*) Family heirloom handed to Anna Swartz in the 1950's. Small to medium, dark blue-green, mottled skinned fruit to 2-4kg, with very sweet, yellow flesh. Hard skin with excellent storage. Vine. 90-100 days. 10 seeds

AUSTRALIAN BUTTER (*Cucurbita maxima*) Australian heirloom. Large, yellow fruit with thick, dry, orange flesh & small seed cavity. Weighs up to 6kg. Stores well. 90-100 days. 12 seeds

BLACK FUTSU (*Cucurbita moschata*) Rare & unusual Japanese heirloom. Highly attractive, small to medium, flattened round fruit with heavy ribbing. Begins black in colour maturing to a shady grey-orange then a tan, light brown colour upon full maturity. Thin, exceptionally sweet flesh with large seed cavity. Has an interesting and unusual appearance of being mouldy even though it is not. Stores up to 6 months. Excellent when roasted with skin on. High yields with 4-5 fruit per plant. 100 days. 15 seeds

BLUE HUBBARD Heirloom dating back to 1798. Blue-grey, warted, oval fruit, with thick, bright orange-yellow, fine textured flesh. Stores well. Used in pies, baked or stewed. Originated in the West Indies. 100-120 days 15 seeds

HISTORY

PUMPKIN: BLUE HUBBARD

This fruit was carried from the West Indies to

New England in 1798 by a sea captain whose name has since been lost. A few gardeners from Massachusetts grew it, saving the seeds from year to year.

Around 1842, Mrs. Elizabeth Hubbard noticed its excellent eating qualities and handed it onto her neighbour who was a seedsman. He named it after Mrs. Hubbard and multiplied the seed for sale. The "Hubbard" went on to win acclaim & to become highly regarded for its fine grained, very dry, sweet, rich flavour.

BUTTERNUT LONGNECK (Cucurbita moschata) Similar to regular butternut pumpkin but with a much longer neck. Ideal for soups. Pies, or roasting. Great for spirals. 15 seeds

CANADA CROOKNECK (Cucurbita moschata) Heirloom dating back to 1827. Rare. Creamy, yellow, bottle shaped fruit (similar to 'Waltham Butternut') with a curved neck & smooth, thin skin; 1-2kg. Creamy texture with nutty, sweet flavour. Excellent roasted or mashed. Disease resistant. Well suited to a wide range of climates & conditions. Stores well. Vine. 90-100 days. 22 seeds

CHIRIMEN (Cucurbita moschata) Japanese heirloom first introduced into European market by Aggeler & Musser Seed Co in 1922. Medium, dull orange, globe shaped, ribbed fruit with warty skin to 4kg with deep orange, moist, sweet flesh. Excellent flavour. 95-110 days. 20 seeds

DILLS ATLANTIC GIANT (Cucurbita maxima) Huge, pale yellow-orange fruit, with smooth skin & slight ribbing, to 200kg (current record as large as 485kg) & 1.5m across produced on vines to 4m long. Despite its size, flesh is smooth, creamy & full of flavour. Proper nurturing will produce a huge show pumpkin. For use in pies, carving, decoration etc. 110 days. 8 seeds

FORDHOOK ACORN (Cucurbita pepo) Heirloom first introduced by W. Atlee Burpee of Philadelphia & named after their Fordhook trial grounds in Pennsylvania. Cream coloured, acorn shaped fruit to 1kg produced on vining plant. Very popular in the 1920's; rare today. 56-85 days. 20 seeds

GALEUX D'EYSINES (Cucurbita maxima) French heirloom meaning 'embroidered with warts' from 'Eysines' a small city in the south west of France. Pale, salmon-peach fruit with heavily protruding warted skin; 5-10 kg. Sweet, moist, orange flesh; great for soups. Best harvested before over-maturing as warts continue to grow & cover the entire fruit. 90-100 days. 18 seeds

GOLDEN HUBBARD (Cucurbita maxima) Heirloom first introduced in 1898 by DM Ferry of the Ferry-Morse Seed Co. Also known as 'Red Hubbard' or 'Genesee Red Hubbard'. Attractive, golden orange, tear drop shaped fruit with moderate warting to 5kg. Thick, dry, golden flesh with fine texture & excellent flavour. Stores well. 90-105 days. 18 seeds

GOLDEN NUGGET (Cucurbita maxima) Early, compact, bush variety, with small flat, roundish shaped fruits. Fibreless flesh & nutty flavour. Heavy producer. Popular variety. Stores well. 75-95 days. 15 seeds

GRAMMA TROMBONE Heirloom. Large, long-necked, cylindrical, trombone shaped, bluish-green fruit to 60cm with pale green striping ripening to orange. The fruit has very thin skin making it very easy to peel, and sweet, moist flesh with excellent, rich flavour. Excellent eating ideal for mashing, pies, scones & soup. Has solid 'neck' making it easy for cutting. Short term storage only. 90-100 days. 25 seeds

GREEN HUBBARD (Cucurbita maxima) Heirloom dating back to 1798. Large, dark green, knobly fruit with sweet, dark orange flesh. Stores well. 110 days. 25 seeds

DID YOU KNOW?

The name 'pumpkin' comes from the Greek 'pepon' meaning large melon.

HEIRLOOM MIX Mix of various colours, shapes & sizes of heirloom pumpkin. Taken from a mix of up to 30 different varieties. 25 seeds

KUMI KUMI (Cucurbita pepo) Heirloom; also known as 'Kamo Kamo' by Maori people. Heavily ribbed, speckled green, soft skinned fruit 20-30cm across with nutty flavour. Harvest when young for use like zucchini or marrow, or leave to mature for use like pumpkin. Trailing vine. 100 days. 22 seeds

LITTLE TROMBONE (Cucurbita moschata) Italian heirloom. Also known as 'Rampicante' or 'Climbing Zucchini', or 'Albenga Pumpkin'. When harvested young for use like zucchini, fruit is long, slender & green with flattened bulb at end & tender, mild flavoured flesh. Large yellow flowers are ideal for stuffing. When left to mature for use as pumpkin, brown, thin skinned fruit reaches up to 1m in length. Similar in appearance to regular 'Butternut' pumpkin, but with much longer neck. Ideal for cutting as seeds are only in bulb at bottom. Trailing vine. Popular variety. 25 seeds

LONG ISLAND CHEESE (Cucurbita moschata) Heirloom dating back to 1824, & named for its resemblance to a cheese wheel. Attractive, medium to large, flattened, slightly ribbed fruit with light orange skin & sweet, deep orange flesh. Weight to 4kg. Stores well. 90-100 days. 12 seeds

MARINA DI CHIOGGIA (Cucurbita maxima) Italian heirloom. Highly attractive, large, grey-green, heavily ridged & bumpy fruits to 4.5kg with sweet, dry flesh. Flavour improves with storage. Stores well. 95-100 days. 12 seeds

MUSQUEE DE PROVENCE (Cucurbita moschata) French heirloom first introduced to seed customers in 1899 by Vaughan's seed Store in Chicago. Very large, attractive flat fruit to 10kg resembling large wheels of cheese. Colour is olive green ripening to a deep, rich brown when fully mature. Ideal for baking. Stores well. 100-110 days. 12 seeds

PINK BANANA JUMBO (Cucurbita maxima) Heirloom over 100 years old. Large, oval, slightly curved, pink-orange fruit up to 15kg & 75cm length with sweet, dry, orange flesh. Vigorous vine. Used in pies or baking. 100-110 days. 20 seeds

QUEENSLAND BLUE (Cucurbita maxima) Australian heirloom dating back to 1920's. Medium to large, smooth, blue-grey & heavily ribbed fruit to 4.5kg with thick, sweet, dry, deep orange flesh. Ideal for roasting or soups. Stores well - up to 6 months. 100-110 days. 10 seeds

RED KURI (Cucurbita maxima) Japanese heirloom also known as 'Orange Kokkaido', 'Uchiki Kuri' or 'Baby Red Hubbard'. Brilliant red-orange, tear-drop shaped fruit to 5kg with golden, smooth, dry, sweet flesh similar to the taste of chestnuts. Easy to peel. Vine. High yields even in cool areas - produces well right up to the first frost. Stores well. 92-100 days. 15 seeds

RED WARTY THING (Cucurbita maxima)

Heirloom first introduced in 1897 by James J. H. Gregory of Marblehead. Also known as 'Victor' due to the number of first prize ribbons won at agricultural shows. Huge, orange fruit covered with small bumps or 'warts' with hard, thick rind. 90-100 days. 12 seeds

ROUGE VIF D'ETAMPES (Cucurbita maxima) Old French heirloom once the most popular pumpkin in the central market in Paris during 1880's. First introduced into the wider market by W. Atlee Burpee in 1833. Translates as 'Deep Red' & also known as 'Cinderella Pumpkin' being the pumpkin described as the coach in the story. Attractive, large, flattened, ribbed, deep red/orange fruit to 50cm across & up to 15kg. Average eating qualities with flesh best used in pies & pumpkins; great ornamental. Vine. 12 seeds.

SIBLEY (Cucurbita maxima) Heirloom first introduced in 1887 by Hiram Sibley & Co. but dates back prior to this with seed being obtained from an elderly woman in Van Dinam, Iowa who had grown the variety for more than 50 years previously. Also known as 'Pike's Peak'. Slate-blue, tear-drop shaped, elongated fruit 3-5kg with intense, sweet, orange flesh with little fibre. Flavour sweetens upon storage. Vining plant to 5m. Stores well. 100-110 days. 12 seeds

SILVER EDGED (Cucurbita maxima) Heirloom first introduced by Gill Brother's Seed Company. Flattened, bluish-grey fruit with deep orange, thick flesh, creamy, dry, fine-grained texture (no strings), and a rich buttery flavour similar to sweet potato. Ideal for soups, muffins, mashed, baked etc. Vigorous, spreading vine. Stores for up to 8 months due to hard shell when mature. 100-110 days. 18 seeds

STRAWBERRY CROWN (Cucurbita maxima) Heirloom from Brazil. Very attractive, dusky brown coloured fruit to 3kg with a hint of strawberry colour at the crown. Excellent rich flavour without the strings. Best when baked & roasted or in soups. Trailing vine. Early variety. 90 days. 8 seeds

TRIABLE (Cucurbita maxima) Australian heirloom; rare. Also known as 'Tristar of Shamrock' or 'Triangle'. Light green, lobed fruit, 3-5kg with sweet, thick, orange, fine grained flesh. Interesting & unusual with appearance similar to a 3 leaf clover. Stores well. 110-120 days. 22 seeds

TURKISH TURBAN (Cucurbita maxima) French heirloom introduced 1817. Pumpkin with distinctive top cap, & unusual orange, red, white & green markings on skin. 25cm diameter. Trailing vine to 3m. Stores well. Use cooked or as decoration. 80-120 days. 18 seeds

WALTHAM BUTTERNUT Originated with Joseph Breck and Sons, Boston in the early 1930's. Pear shaped fruit with smooth light brown skin & small seed cavity. Rich orange flesh & nutty flavour. Vigorous vines. Heavy producer. 80-100 days. 35 seeds

WHANGAPARAOA CROWN (Cucurbita maxima) New Zealand heirloom first discovered in from Whangaparaoa Bay. Also known as 'New Zealand Storage Pumpkin'. Grey, thin skinned, flattened, slightly ridged fruit with sweet, dry, deep orange flesh. Small seed cavity. Ideal for roasting. Stores well. 115 days. 12 seeds

WINDSOR BLACK (Cucurbita maxima) Deep green, almost black skinned fruit with rich, orange flesh. Excellent all-round pumpkin for baking, mashing, pies etc. 12 seeds

WINTER LUXURY (Cucurbita pepo) Also known as 'Livingston's Pie'. First introduced in 1893 by

Johnson & Stokes Seed Co. Almost completely round fruit, golden russet coloured with delicate white netting to 4kg with thick, sweet, pale orange, smooth flesh & small seed cavity. Vine. Stores well. Excellent for baking, roasting, pancakes etc. 85-90 days. 20 seeds

RADICCHIO

Mature plants tolerate frost. Used fresh in salads to add colour, or cooked. Colour best during cooler weather. Approx. 900 seeds / gram

SOW WHEN TEMP	SOIL
Cool: Late Winter to Late Spring 25°C	10-
Warm: Early Autumn to Early Spring	
Tropical: Mid Autumn to Late Winter	

PALLA ROSSA Heirloom. Attractive, dark red leaves with white veins, forming large head. Delicious tangy flavour without any bitterness. Slow to bolt. 60-70 days. 800 seeds

RADISH

(Raphanus sativus) Tolerates cold conditions. Young leaves may also be used in salads. Matures quickly. Approx. 80-180 seeds / gram

SOW WHEN TEMP	SOIL
Cool: Early Spring to Mid Autumn	7-28°C
Warm: Late Winter to Late Autumn	
Tropical: All Year	

COMPANIONS

LIKES: Peas, Lettuce, Beans, Carrots, Kohlrabi, Parsnip, Onion, Mustard, Nasturtium, Cucumber, Spinach - attracts leaf minor away from spinach.

DISLIKES: Grape, Hyssop

BLACK SPANISH (Raphanus sativus) Originating from Spain since around 16th century; first introduced to english market prior to 1824. Also known as 'Ramolaccio', or 'Noir Gros Rond D'Hiver'. Large, black root to 7cm across with solid, crisp, pure white, pungent flesh. 53-80 days. 325 seeds

CHAMPION Oval radish to 4cm, with red skin & crisp white flesh. Mild flavour. 25-40 days 600 seeds

CHERRY BELLE Oval radish to 4cm, with red skin & crisp white flesh. Mild flavour. First introduced in 1949. 25-40 days. 450 seeds

CHINA ROSE Heirloom first introduced in 1840 by Jesuit missionaries. Smooth pink-rose coloured skin with crisp white flesh; 5cm diameter. Tall tops may also be used in salads. Stores well. 27-55 days. 500 seeds

CININNATI MARKET Dates prior to 1870's. Bright, red-pink, long, thin, tapered root to 15cm long with similar shape to a carrot. Tender, crisp & mild flesh. 25-30 days. 265 seeds

DAIKON Large, white root 40-50cm long. Japanese variety. Use in salads, stir-fry, pickles or cooked. Useful in breaking up the soil. Readily self-sows. 500 seeds

EASTER EGG Heirloom. Annual. Round radish with a mixture of different colours including red, pink, purple & white. Harvest in 3-4 weeks. Root remains crisp & mild in flavour even when large. 25-58 days. 600 seeds

FIRE CANDLE Italian heirloom. Long, thin

pointed root with bright red skin & crisp white flesh. Mild flavour with good texture. 28-30 days. 350 seeds

FRENCH BREAKFAST Dates back to 1879. Scarlet-coloured roots with white tip. Length 5-9cm. Popular variety & easy to grow. 24-30 days. 600 seeds

HISTORY

RADISH: French Breakfast

Introduced before 1885, this radish was a favourite amongst French market gardeners who thought it to be both attractive & flavoursome.

Faust's 1889 seed catalogue described it : "It's beautiful colour makes it one of the most attractive for table use, while its superior quality recommends it to all." Today, more than 100 years later, the French Breakfast is still considered a first rate radish.

GERMAN GIANT Heirloom originating from Germany during the 1800's. Very popular with the Amish. Large, globe-shaped crimson coloured roots growing to the size of a baseball - up to 10cm across. Firm, crisp, white flesh with mild flavour. Grows to a large size without becoming hollow, woody, or pithy. 29 days. 700 seeds

GOLDEN HELIOS Polish heirloom. Golden, yellow-skinned root with crisp, white flesh & mild to medium pungent flavour, but not overly 'peppery'. Slow to go 'pithy'. 35 days. 330 seeds

HAILSTONE - WHITE GLOBE Pure white skin, with firm, crisp flesh & dark-green leaves. 25-30 days. 600 seeds

LADY SLIPPER Elongated, light pink, flat-bottomed, smooth root to 8cm long with crisp texture & sweet, mild flavour. Slow to go pithy. Stores well in fridge. 25-30 days. 800 seeds

MIXTURE (GOURMET BLEND) Mix of at least 10 different varieties. Includes red, pink, white, bi-colour & black in both round & long shapes. 27-55 days. 600 seeds

PLUM PURPLE Heirloom. Medium sized, crisp, firm radish, with bright purple skin & white flesh. Attractive. 25-30 days. 450 seeds

RAT TAILED Heirloom from South Asia. Grown for its edible seed pods rather than its root. Produces light green, elongated pods which grow up to 15cm long & may be eaten raw, or pickled. Harvest pods while still young for best results. 50 days. 180 seeds

RED HEAD Heirloom also known as 'Roodkopje' in Holland. Attractive, round white root with rose coloured 'cap' 2-5cm across. Crisp flesh with mild flavour. Resistant to splitting. 30-35 days. 350 seeds

TOKINASHI Japanese heirloom also known as 'All Seasons'. Daikon type. Well suited to all-year-round sowing except for areas where temperatures drop below freezing. Pure, white, pungent (hot) root to 30cm long and 5cm across tapering to a sharp point with firm, white crisp flesh. Slow to bolt. Great for salads, coking or pickling. 330 seeds

WATERMELON Chinese heirloom. Also known as 'Red Meat', 'Continental Fancy' or 'Beauty Heart' from the Chinese 'Shin-ri-mei' which means 'beauty in the heart'. Gourmet, turnip shaped radish to 8cm across at shoulder with white skin & red flesh. Tender, sweet & mild - sweeter in flavour than traditional varieties. Colourful in salads. 50-60 days. 350 seeds

WHITE ICICLE Heirloom first recorded in 1597. Also known as 'Lady Finger'. White, medium-sized radish with crisp flesh. Does not go pithy when mature. 25-35 days. 600 seeds

ZLATA Polish heirloom. Yellow, round to plum shaped, medium sized root with crisp, white, juicy flesh. Mild to medium spicy flavour. Resistant to bolting & splitting. 35-40 days. 450 seeds

RHUBARB

(Rheum rhabarbarum) Perennial. Stems used cooked (mainly in desserts). Leaves poisonous & used in garden as insecticide. Pick outside stems as required. Approx. 100-250 seeds / gram

SOW WHEN TEMP	SOIL
Cool: Early Spring to Early Summer	15-25°C
Warm: Late Winter to Early Summer	
Tropical: Late Summer to Late Autumn	

VICTORIA Heirloom. Broad, upright, reddish-green coloured stems with mild tart flavour. Hardy variety. 100 seeds

ROCKMELON

(Cucumis melo) Sow after frost. Approx. 30 seeds / gram

SOW WHEN TEMP	SOIL
Cool: Mid Spring to Early Summer	20-30°C
Warm: Early Spring to Early Summer	
Tropical: Mid Winter to Late Summer	

COMPANIONS

LIKES: Corn, Peanut, Sunflower. Radish

AMISH Heirloom from the Amish community. Oval fruit 20cm across with sweet, orange flesh & thick rind. Tolerates wide range of conditions. 80-90 days. 40 seeds

BANANA Heirloom dating back to 1800's. Fine. Long, tapered, yellow-skinned melon, with delicious, pink-red flesh to 45cm long & 10cm across. Excellent flavour. Sow after frost. Best suited to warm climates. 80-95 days. 45 seeds

BIDWELL CASABA Heirloom named after John Bidwell, a well-known Civil War General & US Senator. First introduced in 1869. Extremely large melon up to 35cm across & 7kg in weight. Melon has green striped patterns and sweet, orange flesh. Described by Amy Goldman as tasting like 'heavenly orange sherbert', in her book 'Melons for the Passionate Grower'. 90-95 days. 30 seeds

CRANE Introduced in 1920 by the Crane family from California. Attractive, tear drop shaped melon with unusual dark green freckles on lighter green skin; sweet, light orange flesh. Fruit is ready when freckles turn orange. 75-85 days. 40 seeds

DELICE DE TABLE French heirloom dating back to 1885 - translates as "Delight of the Table". Rare. Round, heavily ribbed fruit has very sweet orange flesh. Weighs around 500g. 40 seeds

EMERALD GEM (Cucumis melo) Heirloom introduced in 1886 by W. Atlee Burpee Company from seed obtained from William Voorbees of Benzie County. Dark green, slightly ridged fruit 1-1.5kg. Thick, pale orange, rich, juicy flesh with sweet, spicy flavour. High yields. 70-90 days. 25 seeds

FRENCH CHARENTAIS French heirloom

dating back to 1787. Small melon with sweet, thick, deep-orange, flesh, & small seed cavity. Flesh has deep, aromatic, flowery aroma. Sought after variety. Best suited to cooler areas. 90 days. 55 seeds

HALES BEST Developed by a Japanese market gardener around 1920. Vine. Popular variety. Netted skin with delicious orange flesh. Disease resistant. 75-88 days. 120 seeds

HEARTS OF GOLD Heirloom dating back to 1890 & first introduced by Roland Morrill. Also known as 'Hoodoo'. Thick, orange flesh with strong, sweet flavour. Flesh is firm & juicy. 70-90 days. 85 seeds

HEALY'S PRIDE Heirloom first introduced by Elmer James Healy of St. Francisville, Illinois in 1952. Large, elongated, heavily netted melon weighing up to 5kg. Sweet flavoured orange flesh & fine texture. 80-85 days. 40 seeds

HOLLYBROOK LUSCIOUS Heirloom dating back to 1905 & first introduced by T. W. Woods & Sons from Virginia. Large, oval, dark green, heavily ribbed fruit with thick, pale orange, sweet & juicy flesh which melts in your mouth. Rich flavour & aroma. Fruit to 20cm long, weighing 4-5kg. Easily bruised due to thin skin so handle with care. Vine. 100-110 days. 25 seeds

INDIAN CREAM COBRA Rare & unusual heirloom melon. Attractive, elongated melon with thin yellowish skin which splits & peels back when ripe - resembling a cobra's hood. Flesh is dry with both an unusual flavour & distinctive smell. Not as sweet as other varieties, but still pleasant especially when drizzled with honey or served with ice-cream. 50 seeds

NOIR DES CARMES (Cucumis melo) French heirloom, first mentioned by Mawe & Abercrombie in 1787; also known as the 'Black Rock' melon preserved by the Carmelite monks. Small, dark green, deeply ribbed fruit to 0.5kg, with smooth skin, ripening to a mostly orange, mottled green colour when fully ripe. Orange, sweet, aromatic flesh. Vine. Early variety, well suited to cooler climates. Rare, unusual variety. 75-85 days. 25 seeds

OKA (Bizard Island Strain) Canadian heirloom dating back to 1912. First discovered on Bizard Island, one of the islands in the St. Lawrence River. Also known as 'Bizard Island Melon'. Medium to large, netted, flattened fruit with creamy, yellow-green ribbed skin & orange, moderately sweet, highly aromatic flesh. Early to mature. Well suited to cooler areas with short growing seasons. 80-90 days. 35 seeds

PETIT GRIS French heirloom first discovered in the garden of Bishop of Remmes over 400 years ago. Named after its greyish appearance before ripening - 'Petit Gris' translates as 'Little Grey'. Small, smooth skinned, mustard & olive speckled fruit to 1kg with sweet, orange flesh reminiscent of brown sugar. 80-85 days. 35 seeds

PRESCOTT FOND BLANC French heirloom dating back prior to 1850. Highly attractive, flattened, heavily ribbed fruit with warts & bumps. Salmon orange flesh with grey-green skin turning straw yellow when ripe. Rich flavour when harvested ripe. Highly fragrant. Approx. 8 fruit per vine. Drought tolerant. 100 days. 35 seeds

SCHOON'S HARDSELL First introduced onto the market in 1947 by F. H. Woodruff & Sons from Connecticut. Also known as 'Illinois Hardshell'. Attractive, aromatic, oval netted fruit to 4kg with a very hard shell. Sweet, flavoursome, apricot coloured flesh. Resistant to insect attack. Stores well. 55 seeds

SALAD GREENS

See "Sow When" Chart for individual suggested growing times. The following times apply unless otherwise indicated.

SOW WHEN TEMP	SOIL
Cool: Early Spring to Late Autumn Warm: Early Spring to Mid Autumn Tropical: Early Autumn to Mid Winter	12-25°C

AMARANTH

(Amaranthus gangeticus) Also known as Chinese Spinach. Use like spinach, in soups, salads or stir-fry. Easy to grow & tolerates a wide range of growing conditions. Heat resistant. Barely cover seed with soil as it needs light to germinate. Approx. 800-1300 seeds / gram

SOW WHEN TEMP	SOIL
Cool: Early Spring to Late Spring; Mid Summer to Late Summer Warm: Early Spring to Early Autumn Tropical: Late Summer to Late Spring	

MEKONG RED Heirloom. Broad, vivid red, dented leaves. 30-50 days. 800 seeds

CORN SALAD

(Valerianella locusta) Also called "Lamb's Lettuce". Pick outside leaves as required or leave to mature. Great substitute for lettuce during cooler months. High in Vitamin C. Use raw in salads, steamed or cooked like spinach. Tolerates cooler weather. Very hardy. Approx. 700-1150 seeds / gram

SOW WHEN
Cool: Late Winter to Late Spring; Autumn Warm: Late Summer to Mid Spring Tropical: Mid Autumn to Early Spring

DUTCH BROAD LEAVED Also known as 'Mache' or 'Lambs Lettuce'. Delicate rosettes of green, smooth, spoon-shaped leaves. Pick outside leaves as required or leave to mature. Great substitute for lettuce during cooler months. High in Vitamin C. Use raw in salads, steamed or cooked like spinach. Tolerates cooler weather. Very hardy. 40-60 days. 600 seeds

CRESS - CURLED (Lepidium sativum) Annual. Dark green, curled leaves with peppery flavour. Used as sprouts, or left to mature in garden - leaves picked as required. May also be grown as lawn (in out-of-traffic areas) damp areas only. 1500 seeds

DANDELION - RED RIB (Chicorium intybus) Heirloom. Dark green leaf with bright red stem & mid-vein. Attractive variety. High in nutrients. Colourful addition to salads etc. Pleasant bitter flavour with a background sweetness. 40-60 days. 550 seeds

MARSHMALLOW (Althea officinalis) Perennial. Medicinal herb with soft, slightly furry leaves & pale-pink flowers. Leaves, flowers, seed pods & roots are edible. Height to 1.5m. 300 seeds

MESCLUN - LETTUCE MIX Mix of various lettuce types of various shapes & colours, including iceberg, cos, mignonette, frilled, speckled etc. 50 days. 1500 seeds

MESCLUN - MILD MIX Mixture of salad greens of varying colours & shapes, typically including Rocket, Tatsoi, Mizuna, Radicchio & lettuces such as Cos Verdi, Rabbit Ear, Oakleaf, Buttercrunch etc. Great for making attractive salads. 1000 seeds

MESCLUN - ORIENTAL MIX A mix of leaves which excels during the cooler winter months. Leaves harvested for use in salads, or plants left to mature for

later use in stir-fry or other light cooking. Includes a mix of komatsuna, mustard, kale, mizuna, mibuna, red cabbage, green broccoli, pak choi, bok choy. Quick growing. 60-70 days. 1200 seeds

MESCLUN - SCARLET MIX An attractive mix of all things red. Great for adding colour to salads & lettuce mixes. Includes a mix of Beetroot 'Bulls Blood', Pink Orach, Mizuna 'Red Streaks', Dandelion 'Red Rib', Rocket 'Dragons Tongue', Sorrel 'Red Veined Bloody Dock', Pak Choi 'Purple', Mustard 'Deep Purple', Lettuce 'Red Velvet' & Salad Bowl Red', Amaranth 'Mekong Red', Kohl Rabi 'Purple Vienna', Kale 'Red Russian'. Best grown in Autumn with harvest in cooler months when colour intensifies. Quick growing. 60-70 days. 1200 seeds

MIBUNA - GREEN SPRAY (Brassica japonica) Heirloom. Long, slender, green leaves used at young age in salads & stir fry, or cooked. 40-60 days. 500 seeds

MINUTINA (Plantago coronopus) Italian heirloom also known as 'Erba Stella' or 'Bucks Horn Plantain' dating back prior to 1586. Widely used during this time in a typical Italian salad mix called 'misticanza' which consisted of a mix of wild and cultivated leaves and also as a medicinal green for reducing fevers. 2200 seeds

MIZUNA (Brassica juncea var. japonica) Heirloom. Large, green, spicy leaves. Best picked when young & tender. Tolerates cold & wet conditions. Used in salads or stir fry. 40-55 days. 1000 seeds

MIZUNA - RED STREAKS Light green, thin, jagged, heavily fringed leaves with deep purple tinges. Mild, peppery, earthy, mustard flavour. High in nutrients. Best harvested young when colour is at its deepest red. Ideal for mesclun salads, stir-fry or soups. Quick to grow. Tolerates heat well. Slow to bolt. 20-45 days. 1000 seeds

MOUNTAIN SPINACH - RED ORACH (Atriplex hortensis) Heirloom dating back to 1213; cultivated in Asia & Europe prior to the introduction of spinach. Annual. Attractive reddish-purple leaves, growing to 120cm in height. A spinach variety grown in warmer weather. Used to add colour in salads or cooked as spinach substitute. Pick leaves as required. 50 days. 200 seeds

NASTURTIUM (Tropaeolum majus) Perennial. Low spreading vine often used as a ground cover. Round, flat, pale-green leaves with peppery taste & bright orange/yellow flowers. Leaves & flowers used in salads. Seeds also reputed to have antibiotic properties. 15 seeds

NASTURTIUM PEPPER

Dry seeds until crisp. Grind in coffee grinder. Store in tightly capped bottle. Add a little salt if required.

PURSLANE - GREEN (Portulaca oleracea) Heirloom grown for thousands of years as an edible and medicinal plant. Considered quite nutritious due to its unusually high omega-3 fatty acids (found mostly in fish and flax seeds) and significant amounts of vitamins A and C, as well as calcium, iron, magnesium and potassium and antioxidants. Fast growing plant with succulent leaves and stems. Green leaves added to mesclun mixes to impart a slightly sour, tart hint. When cooked purslane becomes mucilaginous acting as a thickener in soups and stews. Leaves may also be fried in olive oil, then mixed with feta cheese, tomato, onion, garlic and oregano (a traditional Greek dish). 2800

seeds

ROCKET (*Eruca sativa*) Heirloom. Medium-dark green leaves, with spicy/peppery flavour - best when picked young. Flowers & leaves used in salads. Oil made from seeds. Easy to grow. 55-60 days. 1000 seeds

ROCKET - DRAGON'S TONGUE (*Diplotaxis tennifolia*) Wild rocket variety with striking purple-red, heavily serrated leaves with red vein up centre & 'branches'. Highly attractive with stronger flavour than regular rocket. Leaves added to mesclun mixes or eaten on their own. Yellow flowers also added to salads & as garnish. Slow to bolt. Tolerates dry conditions. 50 days. 1000 seeds

ROCKET - WASABI (*Diplotaxis erucoides*) Similar to regular rocket with the exception of its fiery, hot, peppery heat similar to traditional wasabi. Long, green, oval, spoon shaped leaves with slight indentation. Younger leaves able to be harvested within 2 - 3 weeks of planting. Easy to grow. Tolerates dry conditions. 50 days. 500 seeds

SALAD DANDELION (*Taraxacum officinale*) Bi-annual. Originally from France. Named after the French term 'Dent de Lion' meaning lions tooth referring to the jagged 'teeth' on the plant's leaves. Large plant with green leaves formed in an attractive rosette shape. Excellent for fresh eating as it doesn't have the bitter characteristic of some dandelion varieties. Passed on to us by an enthusiastic Tasmanian grower who commented that 'For salad passionate it is a must have!' Use the young leaves in salads, older leaves as boiled greens, or spinach substitute. Roots can be roasted & used in place of coffee, or lifted and forced during winter, like Belgian Endive. 200 seeds

SORREL, FRENCH (*Rumex acetosa*) Perennial, culinary herb/vegetable. Rich, green leaves used fresh in salads, or cooked in soups, sauces, dressings etc. High in Vit.C & copper. 1000 seeds

WATERCRESS (*Nasturtium officinale*) European heirloom dating back to 1777. Perennial. Smooth, shiny, dark green leaves used in salads, omelettes, soups or cooked like spinach. Thrives in clear, cool water, or moist ground. High in nutrients. Also reputed to prevent hair loss. Very small seed. 5000 seeds

SALSIFY

(*Tragopogon porrifolius*) Also known as 'Vegetable Oyster'. Mature plants tolerate frost. Grow like carrots. Cool weather improves flavour & texture. Approx. 100-300 seeds / gram

BURPEE'S QUARTER CENTURY Heirloom dating back to 1889 & introduced by the Burpee Seed Company. Also known as 'Burpees Matchless'. Red, medium to large fruit 120-250g with smooth skin, produced on small, upright bush. High yields. Excellent flavour. Performs consistently year after year. 80-85 days. 150 seeds

BURWOOD PRIZE Heirloom first introduced in 1900. Scarlet red, flattened fruit 5-7cm produced on bush to 75cm. Prolific. Reliable tomato developed by Victorian Agriculture Dept.; well suited to Australian conditions. 160 seeds

CAMPBELL Red, round fruit on short bush. Ideal

for all uses especially soups. Early variety. Does well in all climates. 69 days. 125 seeds

ENGLISH CHANDLER Heirloom. Medium sized, round, red fruit with rich tomato flavour. Sturdy bush. High yields. Disease resistant. Reliable producer. 100 seeds

KY1 Australian heirloom. Also known as 'Scoresby Dwarf'. Medium, red, round fruit with excellent flavour on strong, vigorous, disease resistant plant. Prolific. Ideal for preserves, sauces & pastes. 70 days. 120 seeds

MARY ITALIAN American heirloom possibly from Italian descent. Red, medium, beefsteak type fruit to 10cm across with excellent flavour. Early variety. High yields. 70 days. 125 seeds

NAPOLI PASTE Deep red, pear shaped, medium sized fruit with excellent, tangy, acidic flavour. Italian paste type. High yields. Disease resistant. 79-125 days. 140 seeds

ROMA Italian heirloom. Strong, stocky plant producing, red, smooth, pear-shaped fruit with 'meaty' flesh. Heavy producer (up to 200 fruit per plant). Disease resistant. Ideal for sauce, bottling, salads etc. 75-80 days. 180 seeds

SWIFT Heirloom originating from the highland prairies of Canada. Medium, round, red fruit with excellent flavour. Quick to mature. Well suited to cooler conditions, but does well in all areas. 54 days. 150 seeds

THAI PINK EGG Originating from Thailand & is today the most widely produced tomato in Thailand. Small, pink coloured, 'cherry' type fruit; 3-5cm long, or size of bantam egg. Changes from milky white with slight pink colour when young to darker pink as it matures. Plant 60-90cm. Hardy, disease resistant & resistant to cracking. High yields. 55-65 days. 200 seeds

TINY TIM Small, round, scarlet red fruit 2-3cm across, produced on small bush to 50cm high. Ornamental & productive with high yields. Resistant to disease. Ideal variety for small areas or pots. Dates back to 1945. 45-75 days. 200 seeds

WHIPPERSNAPPER Small, reddish pink, oval fruit 2-3cm across with excellent sweet flavour. Produced in clusters of 5-18 fruit per bush. Early variety ripening in just 45 days - great for cool climates with short seasons. Compact plant with numerous side branches - ideal for container growing. High yields with up to 100 fruit per bush in good conditions. 45-59 days. 180 seeds

TOMATO CLIMBING

(Lycopersicon esculentum) Eaten raw in salads, or cooked. Plant after frost. Approx. 350-400 seeds / gram.

AMISH PASTE Amish heirloom from Wisconsin; originally from Lancaster & dating back to 1880. Acorn shaped, deep red fruit 4-6cm wide & up to 250g. One of the largest paste type tomatoes with thick flesh & few seeds. Vigorous climber - requires staking. Excellent for eating fresh in salads, drying, bottling or cooking. 70-90 days. 80 seeds

ARKANSAS TRAVELLER Heirloom developed at the University of Arkansas by Dr. Joe McFerren prior to 1900 - named after a folk song. Rose coloured, medium sized, smooth, thin-skinned fruit with juicy, mild flavoured flesh. Withstands heat & humidity well. Resistant to disease & cracking. 85 days. 130 seeds

AUNT RUBY'S GERMAN GREEN German heirloom originating with Ruby Arnold of Tennessee. Large, brilliant green, beefsteak type fruit weighing up to 500g each. A green tomato which is greenish yellow when fully ripe. Excellent strong, sweet, fruity flavour with great texture. Also flavoursome when harvested early. Requires staking. 69-85 days. 135 seeds

BEAMS YELLOW PEAR Heirloom. Bright yellow, small, pear shaped fruit to 4cm long with meaty, zesty, mild but sweet flavoured flesh. High yields, continuing to produce until first frost. Has been known to produce up to 1500 fruit per bush under ideal growing conditions. Disease resistant. Produces well even in cool areas. 70-80 days. 180 seeds

BEEFSTEAK Heirloom. Also known as 'Red Ponderosa' or 'Crimson Cushion'. Large, red, flattened, slightly ribbed fruit to 900g with solid flesh & few seeds. High yields. Excellent flavour. 85 days. 150 seeds

BLACK CHERRY Rare variety with dark, dusky, purple / black coloured fruit resembling large grapes to 3cm across, produced in trusses on tall, vigorous bush. Sweet, juicy flesh with rich, smoky flavour similar to a cherry. High yields. Resistant to cracking. 64-70 days. 110 seeds

BLACK KRIM Russian heirloom originating from the Island of Krim in the Black Sea. Large, red/purple coloured skin with green shoulders; flattened fruit to 9cm across. Juicy, green tinted flesh with full flavour & slight saltiness. Seeds surrounded by an almost fluorescent green gel. Outstanding flavour. Plant to 150cm. Hardy variety. 69-90 days. 150 seeds

BLACK RUSSIAN Russian heirloom. Round, reddish-black, medium sized fruit 4-6cm across, with smooth, thin skin & dark flesh. Beefsteak type with excellent flavour - reputed to be one of the best tasting black tomatoes. Compact plant. Thrives under cool growing conditions, but does well in all areas. Highly disease resistant. Early producer. Excellent for eating fresh in salads or cooked. 69-100 days. 160 seeds

BLUE RIDGE MOUNTAIN Heirloom from the Blue Ridge Mountain area of North Carolina. Large, pink, beefsteak type to 600g, well known for its excellent flavour. One of the best tasting pink coloured varieties. Tolerant of hot seasons and high humidity, but also does well in cool areas. Large bush requiring staking. 85 days. 160 seeds

BRANDYWINE Amish heirloom dating back to 1885; named after Brandywine Creek in Chester County. Large, red-pink fruits to 500g. Old variety prized for its outstanding flavour. 75-100 days. 160 seeds

BREAK O DAY Smooth, firm, orange-scarlet, globed fruit with meaty flesh, produced on open,

medium sized, spreading bush. High yields. Cold resistant. Dates back to 1931. 63-78 days. 180 seeds

BROAD RIPPLE YELLOW CURRANT Heirloom. Vigorous plant to 3m high producing abundant, tiny, round, yellow fruit to just over 1cm across in clusters of 6-8 fruit. Sweet flavour with no tartness. High yields, producing up to 1000 fruit per bush. In one grower's words it 'goes like crazy'. Hardy bush continuing to produce after frost. Originally found growing in a pavement crack in the streets of Indianapolis. Place whole truss in oven to bake, or sprinkle throughout salads. 75 days. 200 seeds

BROWN BERRY Heirloom. Small, brick-red, round fruit to 2.5cm across. Juicy with semi-sweet flavour and slight acid overtones. 72 days. 150 seeds

BURNLEY GEM Medium, red, globe shaped fruit 4-7cm across produced on bush to 1m. Prolific. Reliable tomato developed by Victorian Agriculture Dept.; well suited to Australian conditions. 69-80 days. 160 seeds

CAMP JOY Heirloom. Large, dark red, cherry tomato up to 4cm across with rich blend of sweet / acid flavour - wins taste tests at all the shows. Strong growing vines with heavy clusters of fruit. High yields. Plant 1.8-2.4m high. Disease resistant. Originating from Santa Cruz & developed by Alan Chadwick, the instigator of bio-intensive gardening. 65-70 days. 160 seeds

CHERRY ROMA Heirloom. Baby, 'plum' or 'roma' shaped, rich red fruit to 2.5cm long with sweet, spicy flavour. Used fresh or dried. High yields. 85 days. 200 seeds

CHEROKEE PURPLE Heirloom. Over 100 years old from Cherokee Indian tribe - one of the first known 'black' tomatoes. Medium sized fruit with rose purple skin and brick red flesh, and sweet, rich, smoky tomato flavour. Plant to 200cm. Great for slicing, salads, cooked or sauces. High yields. 85 days 125 seeds

COLLEGE CHALLENGER Australian heirloom bred in the Hawkesbury region during the 1950's. Medium to large, round, solid, red fruit with excellent flavour. Truss type with 6-10 fruit per truss. Tolerates heat well. 75 days. 120 seeds

COSTOLUTO DI MARMANDE Old Italian heirloom. Red, medium to large, thick-walled, beefsteak type fruit with meaty flesh produced on vigorous vine. Excellent flavour. Good for pastes, sauces, salads etc. 75-85 days. 160 seeds

CURRAJONG Cherry tomato produced on trusses. Excellent tomato flavour. Produces fruit right up until first frost. Hardy. Prolific. 120 seeds

DAYDREAM Heirloom. Large, red, smooth, flattened fruit 60-90mm across. Similar to 'Grosse Lisse' but produces earlier. High yields over a long period. Excellent flavour. 150 seeds

DEBARAO Small, red, egg shaped fruit with smooth skin to 4cm across and excellent flavour. 95 days. 125 seeds

DRUZBA Heirloom originating from Bulgaria via France & means 'Friendship'. Large, smooth, deep red fruit to 400g, with gold shoulders up to 10cm across. High acid with sweet, tart flavour. Plant continues to produce over a long period until completely destroyed by frost. Resistant to disease & cracking. 75-95 days. 150 seeds

EARL OF EDGECOMBE New Zealand heirloom. Large, yellow orange, round fruit with firm, meaty flesh. Named after the heir to the title of the Earl of Edgcombe during the 1960's. 73 days. 135 seeds

EARL'S FAUX Originating from Ohio by grower Earl Cadenhead. Large, reddish pink, beefsteak type fruit to 350g with smooth texture & a complex, lingering flavour. Prize winner at shows. 76-80 days. 160 seeds

EVA PURPLE BALL Heirloom from the Black Forest region of Germany. First introduced in the late 1800's by Joe Bratka's grandfather. Round, smooth, blemish free fruit to 150g. Peels easily and has tender flesh. Disease resistant. 70-78 days. 180 seeds

EVERGREEN Heirloom. Green (when ripe), medium to large, solid, fleshy fruit. Mild, delicious flavour. Vigorous climbing plant. Used in salads, fried, pickled or for green tomato sauces. 72-80 days. 150 seeds

GERMAN GOLD Heirloom dating back to 1890's. Large, golden coloured fruit with red blossom end & red streaks radiating up sides to stem end. Fruit to 800g with sweet, mild flavour. 85-88 days. 150 seeds

GERMAN JOHNSON American heirloom. Very large, pink, 'beefsteak' tomato up to 500g with mild flavoured, low acid, meaty flesh & few seeds. Yellow shoulders develop upon maturity. Large, prolific plant requiring staking. Disease resistant. Good yields. 80 days. 150 seeds

GOLD DUST Medium, orange fruit with firm, crack resistant flesh, free from blemish. Uniform ripening. Semi-climbing bush. 60-65 days. 120 seeds.

GOLDEN GOURMET Also known as 'Golden Gourmet Filler'. Yellow, medium sized fruit to 10cm with thick skin, hollow centre & few seeds. Used fresh in salads or stuffed & baked. 76-80 days. 150 seeds

GOLDEN SUNRAY Heirloom. Golden orange yellow, medium sized fruit to 250g, with rich, full tomato flavour & low acid. High yields. 120 seeds

GRANNY'S THROWING Italian heirloom also known as 'Periforme D'Abruzzo' aptly named as it is the perfect shape to fit in the palm of the hand with indentations for fingers. Rich red, pear shaped, heavily fluted fruit. Excellent for salads, pastes & sauces. High yields. 80 seeds

GREEN GRAPE Heirloom. Green-yellow fruit to 3cm across with sweet, translucent green flesh. Fruit hangs in bunches of 6-12 fruit resembling grapes. 60-65 days. 200 seeds

GREEN ZEBRA Medium, yellow - green fruit (when ripe) to 6cm across, with dark green vertical stripes & emerald green, mild tasting (but certainly not bland), creamy flesh. High yields. Medium sized bush; may be grown without stakes, but best staked to keep fruit off ground. Developed in 1985 by heirloom tomato breeder Tom Wagner of Tater Mater Seeds. 75-90 days. 100 seeds

GROSSE LISSE Heirloom meaning 'large smooth'. Large, oval-shaped, red fruit with excellent flavour. Popular variety. High yields over long period. Vigorous climber - requires staking. 80-100 days. 180 seeds

HARBINGER English heirloom first introduced in 1901. Red, medium sized fruit with fine flavour. Early variety with high yields. Quick to ripen. Will continue to

produce until first frost. 70 days. 145 seeds

HILLBILLY Heirloom originating from Ohio. Also known as 'West Virginia Hillbilly'. Very large, smooth, yellow orange, ribbed fruit, with red, vertical streaks; to 900g. A prize winner, ripening red from middle outwards; attractive when sliced. Beefsteak type. 85-94 days. 125 seeds

INDIAN RIVER Very rare & dating back to the 1950's. Medium to large, red, elongated fruit to 10cm across with thick, firm flesh. Bush 1.2-1.8m high. Resistant to disease. Tolerates heat & humidity well, but also produces well in cooler areas. 70-85 days. 120 seeds

ITALIAN FLAT Exotic heirloom from Italy. Flat, red fruit with rich tomato flavour. High Yields. Use in salads or for making sauces, pastes etc. 70 days. 180 seeds

JAUNE NEGIB Yellow, round fruit to 8cm across with mild flavoured flesh. Semi-climbing bush. 160 seeds

JUBILEE YELLOW Yellow / gold, globe shaped fruit to 10cm across. Flesh is mild, non-acid with few seeds. Bush to 1.5m high. High yields. 70-80 days. 150 seeds

JUNE PINK Heirloom. Also known as 'Pink Earliana'. Rose pink fruit in clusters. Produces over long period until first frost. Disease resistant. Good for salads or sauces. 135 seeds

KOTLAS Heirloom previously known as 'Sprint' & named after the city of Kotlas in the Soviet Union. Small, round, very sweet, red fruit with green shoulders to 60g produced on bush with sparse foliage. Extra early variety bearing in only 59 days. Disease resistant. 150 seeds

LEMON DROP Heirloom. Translucent yellow-lemon, pear shaped, cherry fruit to 2cm across with delicious sweet/tart flavour. Prolific. 85 days. 200 seeds

LONGKEEPER Red, globe shaped fruit to 6cm across. Will continue to ripen after onset of cold weather. 120 seeds

MANAPAL Heirloom. Large, deep red, smooth, round fruit with thick walls, in clusters of 3-5 fruit. Resistant to disease. 80 days. 140 seeds

MONEYMAKER Old English heirloom. Scarlet red, round, smooth fruits with thin skin & solid flesh to 115g, produced on vigorous, open bush. High yields; hence the name. Sets well in all types of weather. Dates back prior to the 1920's. 75-80 days. 125 seeds

MORTGAGE LIFTER Heirloom; originated in 1930 from 'Radiator Charlie' - a radiator repairman from West Virginia - who sold his plants for \$1 each and paid off his mortgage. Large (up to 1.5kg), light red/pink, fleshy fruit. Heavy yields. Great for sandwiches. Disease resistant. 150 seeds

NEBRASKA WEDDING Heirloom originating from the Great Plains. Orange, globed fruit, 8-10cm across with highly flavoursome sweet / acid taste. 90-105 days. 125 seeds

NEW BIG DWARF Heirloom dating back to 1910 & first introduced by Isabell's Seed Company. Pink, beefsteak type fruit to 10cm across with sweet flavour & meaty flesh. Compact plant has deeply crinkled foliage which offers good protection from leaf scald. Medium

sized bush to 75cm high has strong central stem which keeps plant upright. 75-80 days. 150 seeds

OXHEART RED Heirloom. Red, solid, heart shaped fruit with thick flesh. Excellent flavour. Bush 1.2-1.8m high. High yields. Good variety for cooler areas; but does well in all areas. 80-90 days 160 seeds

OXHEART YELLOW Heirloom. Yellow/orange, solid, heart shaped fruit with thick flesh. Excellent flavour. Bush 1.2-1.8m high. High yields. Good variety for cooler areas; but does well in all areas. 80-90 days. 160 seeds

OXHEART WHITE Heirloom. Cream to light yellow, solid, heart shaped fruit with thick flesh. Excellent flavour. Bush 1.2-1.8m high. High yields. Good variety for cooler areas; but does well in all areas. 80-90 days. 80-seeds

PEARLY PINK CHERRY Attractive, dark pink, slightly egg shaped fruits to 3cm across produced in clusters. Excellent flavour. 77 days. 150 seeds

PICARDY Heirloom dating back to 1890's. Red, slightly flattened, globe shaped fruit to 150g on large, climbing vine. Produces large initial set of fruit & will continue to produce until first frost. 76 days. 125 seeds

PINEAPPLE Heirloom originating from Kentucky. Very large, bright yellow, beefsteak type fruit with red stripes & centre. Up to 1kg. Sweet & juicy flavour. Hardy bush. 82 days. 150 seeds

PINK CHERRY CLUSTER Produces large bunches (100-150 tomatoes per bunch) of pink cherry sized, highly aromatic fruit with super sweet, fruity flavour. Early to mature. Extremely high yields. 75 days. 80 seeds

PINK PING PONG Rosy pink fruits same size as a ping pong ball. Tender skin, & very sweet. High yields produced over a long period. 75-85 days. 180 seeds

PRINCIPE BORGHESE Heirloom. Red, plum shaped fruits to 60g, with pointed end, produced in clusters on bush best staked. Plant height to 100cm. Meaty flesh, little juice & few seeds. Ideal for drying - branches and clusters may be hung to dry until leathery. Originating in Italy. 70-75 days. 160 seeds

RAMS HORN Red, medium sized, elongated fruit with small ridges & curved ends. Tolerant of wide range of conditions. Disease resistant. 120 seeds

RED CHERRY COCKTAIL Heirloom. Small, round, red fruits 2.5cm wide, produced in clusters. Produces over a long period. High yields. Popular variety. 150 seeds

RED CLOUD Medium, red, slightly pointed fruit. High yields. Best suited to warm conditions. 80-90 days. 150 seeds

RED FIG Rare American heirloom, named after a sugary sweet which was popular during the mid 1800's. Historically, they were dried before being stored & used during the winter as a substitute for figs. Small, bright red fruit to 4cm across with very sweet skin. Rich, full tomato flavour. High yields. Eaten fresh or for use in jams & chutneys. 160 seeds

RED PEAR Italian heirloom dating back to 1700's. Small, red, pear-shaped fruit produced on clusters. Richer flavour than yellow variety. Produces over a long period. May be eaten raw in salads, cooked, or preserved & as pickles. 70-80 days. 150 seeds

RED RUSSIAN Heirloom. Round, reddish fruit 4-6cm wide, with rich, red flesh. Requires staking. Excellent for eating fresh in salads or cooked. Excellent flavour. 80-95 days. 120 seeds

REISETOMATE Heirloom from Central America also known as 'Traveller' tomato as people on a journey could break off bits at a time to eat like a mandarin. Unusual and attractive red tomato with the appearance of a handful of cherry tomatoes fused together into one. Plant to 1.5m high. 90 days. 150 seeds

ROSE QUARTZ MULTIFLORA Small, pink, cherry fruit produced on trusses. Early variety. 200 seeds

ROUGE DE MARMANDE Heirloom variety first introduced in the early 1900's. Large flat & ribbed fruit with mostly flesh. Excellent flavour. Early to mature. Prolific with high yields. Vigorous bush. Disease resistant. Recommended variety. 60-100 days. 150 seeds

SAN MARZANO Gourmet Italian tomato also known as 'Italian Canner'. Medium, pear shaped, intensely red fruit to 10cm long, produced in clusters on large, climbing vines. Stores well; crack resistant. Ideal for preserving or making pastes & sauces due to its high solids & rich flavour. 70-90 days. 200 seeds

SOLDACKI Polish heirloom dating prior to 1900. Dark pink, flattened fruit with thin skin to 500g. Flesh is firm & low in acid. 75 days. 120 seeds

ST. PIERRE Traditional French heirloom. Large, rich, deep red, round, full flavoured fruit to 10cm across. Low in acid. Great for fresh eating, slicing or preserving. Produces well even in harsh conditions. Great for cooler areas producing right up until first frost. A very popular European variety. 78 days. 60 seeds

STOR GUL Golden yellow - orange, medium sized fruit with smooth skin to 10cm across with rich, fruity flavour. Vigorous bush reaching up to 2.1m in height. High yields. 78-85 days. 150 seeds

SUGAR LUMP Also known as 'Gardener's Delight', 'Delice du Jardinier', or 'Jung's Sugar Lump'. First introduced in Germany in 1950 and named 'Benary's Gartenfreude'. Red, round, cherry type fruit to 2.5cm across produced in trusses containing 6-12 tomatoes. Rich, deep tomato flavour. Does well both outdoors and in greenhouse. Eaten fresh or preserved. 65 days. 180 seeds

SUTTON WHITE Old English variety dating back to 1920's. White to pale yellow, medium, irregular shaped, beefsteak type fruit to 350g. Sweet & fruity flavour. 72-78 days. 150 seeds

TASMANIAN YELLOW Large, bright yellow, beefsteak type fruit to 13cm across & up to 500g. Very sweet, slightly fruity, firm, flesh with numerous seed cavities. 80-90 days. 150 seeds

TIGERELLA Heirloom. Medium, red fruit with vertical, orange stripes. Tangy, tomato flavour. Heavy producer. 55-75 days. 150 seeds

TOMMY TOE Heirloom. Red, medium sized fruit, 2-4cm diameter, produced in bunches. Heavy producer over an extended season. Disease resistant. Vigorous plant requires staking. May also be used for rootstock. 70-80 days. 200 seeds

TROPIC Red, solid, smooth, flattened fruit with thick walls produced on large, strong vines. Resistant to disease. 80-85 days. 180 seeds

VERNA ORANGE Heirloom from Indiana. Very large, orange, oxheart shaped fruit to 1.5kg with dense, meaty flesh & few seeds. Very sweet flavour reminiscent of rockmelon. High yields. 80-100 days. 150 seeds

WAPSINNICON PEACH Rare heirloom. Yellow fruit to 5cm across with furry skin resembling a peach. Very sweet, delicious flavour. 170 seeds

WONDER LIGHT Siberian heirloom. Also known as 'Lemon Vine'. Attractive, yellow fruit resembling a lemon in size, shape and colour. 78 days. 135 seeds

YELLOW PEAR Heirloom dating back to late 1600's. Small, yellow, pear-shaped fruit produced on clusters; mild flavour. Produces over a long period. Heat resistant. May be eaten raw in salads, cooked, or preserved & as pickles. 70-80 days. 200 seeds

HINT

Sprinkle kelp granules around the base of the tomato plant to increase root mass & the ability of the plant to withstand the cooler weather of oncoming winter.

TURNIP

(Brassica rapa) Use roots cooked in stews, steamed, baked. Leafy tops also used in salads or steamed. Approx. 300-500 seeds / gram

SOW WHEN	SOIL TEMP
Cool: Mid Winter to Mid Spring; Mid Summer to Early Autumn	10-30°C

BLACKTAIL MOUNTAIN Developed by Glenn Drowns owner of the Sand Hill Preservation Centre in Iowa during the 1970's. Dark green - blue melon to 30cm across with sweet, juicy, dense, red flesh & thin rind; reputed to 'melt in your mouth'. Early to mature; great for cool areas with short growing seasons, but also does well in hot areas being quite drought tolerant. 70-76 days. 35 seeds

CHARLESTON ELITE Long cylindrical fruit to 12kg with crisp, bright red flesh and excellent flavour. Seeds easy to remove. Resistant to bruising. 85-90 days. 18 seeds

CHRIS CROSS Rare heirloom from Iowa. Large, oval fruit to 10kg with attractive, pale green skin & jagged, dark green markings. Flesh is deep, rich red with excellent flavour & crispness. 85-90 days. 25 seeds

CREAM OF SASKATCHEWAN Rare, Russian heirloom. Pale green, round fruit up to 25cm across with dark green stripes. Thin rind & crisp, very sweet, creamy white flesh and black seeds. Handle with care due to thin skin. Highly attractive. Early variety; one of the best heirloom watermelons for short seasons. 73-85 days. 25 seeds

CRIMSON SWEET Large, round, light green melon with dark green stripes & firm, deep red flesh with high sugar content. Weighs 11-12kg. 85-90 days. 55 seeds

GEORGIA RATTLESNAKE American heirloom dating back to 1830's in Georgia. Oblong, light green fruit with dark green, snakeskin striping; up to 55cm long, 25cm across & weighing 14kg. Thin rind with bright red, firm & sweet flesh. 90 days. 22 seeds

GOLDEN MIDGET Small, golden yellow fruit to 1.5kg with salmon-pink, firm, sweet flesh & black seeds. A 'mini' watermelon, great for individual serves. Fruit is mature and ready to harvest when fruit & entire plant turns to yellow. Dates back to 1959. High yields with over 7 fruit per plant. Early harvest; great for cooler areas with short seasons. 65-70 days. 20 seeds

HEIRLOOM MIX (Cool Areas) Mix of various watermelon types most suited to cool areas with short growing seasons. Includes Cream of Saskatchewan, Golden Midget & Sugarbaby. 35 seeds

HEIRLOOM MIX (Warm Areas) Mix of various watermelon types most suited to warm areas with long growing seasons. Includes Crimson Sweet, Georgia Rattlesnake, Golden Midget, Jubilee, Moon & Stars & Klondike. 35 seeds

JUBILEE Large, oblong, striped fruit with dark green stripes & medium-thick rind. Flesh is firm, bright red & sweet with fine texture & large black seeds. 35 seeds

MOON AND STARS Rare heirloom rediscovered in 1910. Medium to large, dark green, oval

fruit covered with pea-sized bright yellow 'stars' and usually one larger 'moon'. Leaves are also spotted yellow. Sweet, pink flesh with brown seeds. Stores well due to thick skin. 3-4 fruit per plant. 90-100 days. 20 seeds

MOUNTAIN SWEET YELLOW Large, oval, dark & light green striped fruit to 16kg with dark yellow flesh & black seeds. Very sweet, mild flavour with hints of honey. High sugar content. High yields. 90-100 days. 25 seeds

PETITE YELLOW Highly attractive, small, light green melon with dark green jagged stripes to 3kg with aromatic, light, sweet, bright yellow flesh edible right down to the rind & few seeds. Early to mature; ideal for cool areas with short growing seasons. 65-78 days. 30 seeds

SMALL SHINING LIGHT Old Russian heirloom. Small, round, very dark green (almost black) melon to 25cm across with sweet, red flesh. Early to mature - ripens well in cold areas. Attractive foliage. Stores well. 80-90 days. 25 seeds

SUGARBABY Round/oval melons with dark-green rind with juicy sweet bright-scarlet flesh & firm texture. Very early variety. Suited to cooler climates. 80 days. 80 seeds

SWEET DACOTA ROSE Oval Shaped, striped fruit 5-10kg; with bright red flesh & thin skin. Excellent flavour; one of the sweetest open-pollinated melons on the market. High yields. Early to mature with 2-3 fruit per plant. Stores longer than most other melons. 80-82 days. 22 seeds

HINT

To ripen last few melons before winter, wrap them in black cloth or aluminium foil to raise their internal temperature.

ZUCCHINI

(Cucurbita pepo) Sow after frost. Approx. 5-8 seeds / gram

SOW WHEN	SOIL TEMP
Cool: Mid Spring to Early Summer	20-32°C
Warm: Early Spring to Mid Summer	
Tropical: Mid Winter to Early Autumn	

COMPANIONS
LIKES: Bean, Mint, Nasturtium, Radish, Corn
DISLIKES: Potato

BLACK BEAUTY Heirloom. Dark green, glossy fruit, 15-20cm in length & up to 5cm diameter. Popular variety. Creamy-white flesh. Produces early. Prolific. Good variety either cooked or frozen. 50-63 days. 45 seeds

COCOZELLE Italian heirloom. Compact bush. Italian zucchini; pale green, long, cylindrical fruit with dark green stripes. 30 seeds

COSTATA ROMANESCO Italian heirloom. Delicious nutty flavoured, pale-green fruit with slight ridges. Popular variety. May be used like regular zucchini, or picked when 15cm long with flowers attached & fried whole. 20 seeds

EARLY PROLIFIC STRAIGHTNECK Uniform yellow-lemon, slightly rough, club-shaped fruit. High yields. Harvest from 12cm. 35 seeds

GOLDEN ARCH CROOKNECK Heirloom dating back to 1781. Yellow zucchini, bottle-shaped with curved neck & cream-coloured flesh. Heavy yields. Pick when young from 15cm. 40-55 days. 45 seeds

HEIRLOOM MIX Mix of various colours, shapes & sizes of heirloom zucchini. Up to eight different varieties. 25 seeds

KADISHA Heirloom originally from the Kadisha Valley in Lebanon. Dark green, slightly mottled, rounded fruit. Lebanese type. Best picked young from 6cm across. 18 seeds

RAMPICANTE (Climbing Zucchini) (Cucurbita moschata) Italian heirloom. Also known as 'Little Trombone' or 'Climbing Zucchini' or 'Albenga Pumpkin'. When harvested young for use like zucchini, fruit is long, slender & green with flattened bulb at end & tender, mild flavoured flesh. Large yellow flowers are ideal for stuffing. When left to mature for use as pumpkin, brown, thin skinned fruit reaches up to 1m in length. Similar in appearance to regular 'Butternut' pumpkin, but with much longer neck. Ideal for cutting as seeds are only in the bulb at bottom. Trailing vine. 25 seeds

RONDO DE NICE French heirloom. Round zucchini with mottled green-yellow skin. Requires gentle handling as skin bruises easily. Excellent flavour. Quick growing. Heavy producer. Pick when young. Serve steamed at 3-4cm or stuffed at 10cm. 45 days. 15 seeds

ROUND French heirloom. Bush. Round egg-shaped zucchini with grey-green patchy skin, & creamy-yellow flesh; 6cm diameter. Great for use as 'baby' zucchini. Quick growing. Heavy producer. Pick when young. 45 days. 22 seeds

YELLOW STRAIGHT NECK Dates back to 1930. Pale yellow, club-shaped fruit, ripening to golden when mature. Pick from 15cm. 40-50 days. 45 seeds

"It is my passion to open up to you the smorgasbord of seed available, to restore what an industrialised world has taken away, and to do this in the most natural way possible. I thank you for your support & wish for you a most abundant harvest."
